Thread: [Scammed by Cyam UID=483814](#)

Mibby - August 6, 2016, 7:28 am

User Profile: [Cyam](#)

Thread: [< \[Don't Miss This Sale! \] > Earn HUNDREDS Per Week - #1 Online Money Making System!](#)

I bought his eBook on July 7, 2016 @ 4:45 PM for \$46.99 USD. The reason I am opening this report is because of his methods I have ended up with my Paypal being perm limited, possible fraud charges, a negative balance on Paypal (which I had to obviously pay) and eBay fees.

A recent post of mine to warn others I expect it wont be there very long - [Post](#)

Proof is below of how unreliable and LQ this user is, I was patient and whatnot for a little but every time since I need to wait days before a single response to one thing. A side note I was the 2nd person to purchase (almost first off by 1minute) and was promised the best support etc first in line and I got that originally but obviously once something goes south he just disappears.

That method lowkey sounds really good.....I saw his thread before and a bunch of people were saying that the "1st method" could get your paypal limited..

Yeah.. I just want a refund at the very least.

Cyam - August 6, 2016, 8:17 am

1.) Ebook has been updated so the method you used no longer exists, I'm saying this because it just looks like you're dissing on my e-Book intentionally to make me look bad in front of the community.

2.) There are 4 methods inside the e-Book, you could choose not to do this one if you didn't want to fully listen to my advices.

I'm sorry this had to happen this way, that method was tested prior to release and there was no limitations, but turns out it wasn't as safe as I thought it would be.

(Aug 6, 2016 08:17 AM)Frankey Wrote: [\[CITE\]](#) Is the method just selling IPHONES (Guides..?) Because thats a well known method..

Yeah it was, but not like the ones you see in free e-Books. I have been personally doing this method with my own twists to it which were added in e-Book, but seems like eBay is not what it used to be.

Unlike most of the sellers, I write my own shit.

And by the way, I already know that all of you hate e-Book sellers and that discussing this matter further will result in everyone insulting me so please refrain from doing so. I will gladly answer logical questions about what truly happened.

Well I used your eBook. You helped me wholeheartedly with method 1 and told me yourself 1 is the best to do so I focused on it and yes I am trying to humiliate you considering you wont refund me after 2 weeks almost.

Also the eBook was updated? I wouldn't have known never received a copy or heard anything from you. Nice to know I paid for the best package to get duped. I'd like a refund still.

You suggested 1 actually so what advices do I need to literally post the whole skype convo between us for the last month or something? You never recommended anything aside 1. You even said #2 wasn't worth the time.

(Aug 6, 2016 08:52 AM)Pittinger Wrote: [\[CITE\]](#) How do you explain the poor, almost non-existent support?

Stop jumping to facts when you don't know jack shit. Are you my customer? No, you're not.

I'm helping every customer as much as I can with everything I can. (I can also personally prove this by sending you some logs, but I guess I can't 100% prove it).

If support was "poor, almost non-existent", I would have much more unsatisfied customers posting on my thread. Customers almost never complain about my support and you can see that on both Profit Nation and Dragon Profit thread.

Mibby however was a special case in which my help wouldn't be effective. I'm helping with the methods, but I'm not a moral support. It was my fault his Paypal got limited, but he can confirm that I was helping him actively when he was doing them.

If his Paypal wasn't limited, I would also send him an update that he would be able to use, but this way I'm afraid that it's out of my power to help him.

It's a deal dispute, of course there will be "e-book haters". What do you expect?

You've clearly written that you will refund, on your thread. Own up to it, and do it? Only that way you can prevent the "e-book haters"...

OP if he doesn't refund you, hmu I have some spare bucks to help you out.

Nerdi - August 6, 2016, 9:24 am

I don't know what to say, so here's some of my thoughts about this... I can see both sides of the argument.

1) OP deserves a refund because of the refund guarantee if "it doesn't work out for you" - Cryam, change this to "if you make \$0" in the future so you don't have to refund people who use the method poorly and get themselves discovered/banned. Technically speaking, it didn't work out for Mibby...so

your refund promise would definitely apply here. That said, I think the guarantee's wording is pretty shit and could basically open you up to refund claims from EVERYONE. "If it doesn't work out for you" is way too broad Cryam. I could buy your eBook and claim it didn't work out for me because I don't have a PayPal account. Definitely update this man otherwise you're just going to be on the hook for refunds.

2) OP doesn't deserve a refund because the method works, and it's not the eBook's fault he got caught. Plenty of good methods have a chance at getting you in trouble, and it should be up to the method buyer to make sure they are careful and do their research / don't get caught.

(Aug 6, 2016 08:10 AM)Mibby Wrote: [\[CITE\]](#) Remember I was the second person to buy it so yeah.. and it is really good (only method 1...)

This is the OP saying that he was the 2nd person to buy the eBook, and Method 1 is very good... So how can he be asking for a refund? He said himself that Method1 was good, and yet his entire claim here is that Method1 gets you banned. I have a strong feeling that other users could use Method1 and NOT get banned, just like Cryam himself. A high risk at getting in trouble does NOT mean it's a scam... I don't know. All I'm saying is this: If you go buy an ounce of bud from a dealer and then get pulled over & arrested you can't say "OMG THAT DEALER SCAMMED ME - HIS OZ GOT ME ARRESTED". The same logic applies here in my opinion. There's not a 100% guarantee that you'll get limited/banned with Cryam's method and therefor I don't see the scam in this.

akorosnaes - August 7, 2016, 4:49 pm

I've tried 3 of the methods he listed, the iPhone method is way too dangerous and I pulled out so my paypal that I use on a day to day basis won't get limited, and the other two are just completely ineffective.

I've asked for a refund (twice) now, the first time he told me I had to wait 30 days, which is fine. I asked him again today and he told me he can send me an updated copy. I'd still prefer a refund since I am an unhappy "customer", and I messaged him on paypal and skype requesting a refund to which he said I am trying to charge him back.

I'll report back with how his updated copy goes, and if he will truly refund me if I cannot make money.

He sent me a copy of his "Updated" e-book which had an method from one of his bonus(older) e-books.

Dispute escalated to claim on paypal, especially after this bullshit where paypal accounts are getting limited. I did this method and am waiting for payment from buyer(doubt he will pay, it's been a week, but now I'm going to cancel it anyways, not risking my paypal being destroyed)

This guy is a scumbag.
