Karambits get really boring

M9s are already boring so they can't get any more boring

I'd say go for the M9

I personally like the karambit. I have had my karambit tiger tooth for about a year now. Still not bored of it.

In my opinion i would like the karambit doppler.

The karambit has cool animations that i love to play with , so karambit always be my first opinion.
