Thread: [Real way to fake location and walk around with android WITHOUT ROOT](#)

Thatkidwho - August 6, 2016, 11:02 am

Okay, So you want to walk around on Pokemon go with fake locations without root? Okay first. uninstall Pokemon go

2. Go to <https://tutuapp.com/>

3. Download(it is in chinese) Installl it, once you have that done you will see Pokemon go as the first app on it

4 press the little green button by Pokemon go and install it

5. Login (THIS DOES NOT WORK GOT GMAIL GUYS HAS TO BE PTC)

6. move around wiith arrows, make sure mock location is off , and you can enter coords on the left top area their will be an overlay u can click on, figure it out

7. have funn I'll look for a video tutorial or make one myself very soon!

May come back and edit tutorial, this was quickly and poorly written tbh[Video:

I would advise all users to be extremely careful when installing Chinese shit on ur phone! Good luck with this method though.

illusionNXD - August 6, 2016, 12:21 pm

always wanted this because my phone just won't get rooted for some reason would like some screenshots because its in chinese, posting to check this back up when i get back thanks op.

where to click to download it though?

this kid .. just posting shit all day long without a clue ..

nice one , tried it and worked fine but i still prefer to just go out and play or bot, but not play from home

nice find tho ?

regards CCD
