Thread: [Any tutorials how to set up IM4 With Byte Crypter?](#)

**DoxM3** - August 6, 2016, 2:01 pm

Just bought IM4 and Byte Crypter, Are there any tutorials on how to set everything up? Like DNS, Port Forwarding, getting the right settings in IM4, and crypting the stub?

**Alprazolam?** - August 6, 2016, 2:02 pm

I just saw you on leak forums Imfao. Anyways, Enable settings in IM4 (startup, persistence), then in crypter do icon / assembly and crypt it.

Should I just use fag DNS? And is there a VPN that has port forwarding that you would recommend?

Idk about fagDNS, I would just buy a domain and point it to your ip and use that. For VPN, nvpn.
