Mafius - August 6, 2016, 10:43 pm

Ever since I joined I've been constantly using my knowledge to assist users in the Hacking subforums (check post activity stats). I've already done a few successful deals with members here and would really like to use my knowledge to develop products and put them in the Marketplace. L33t would be very helpful to me as it would allow me to post sales threads in the Premium Sellers section and overall give me a bit more validity here.

Thank you for hosting this and good luck to all!

Vegeta - August 6, 2016, 11:05 pm

Adderall - August 9, 2016, 4:12 pm

I think (I can't think at all) that I should get an upgrade because the green colour of L33T is making

my eyes bleed and the only cure is the softened blue colour of UB3R. Without my eyes I can only see an eternal darkness that is surrounding me and I don't want that to happen. I pray every night to the sky hoping that the universe will be enlightened by an abnormal power and that the eternal darkness will be destroyed.

Idk wtf I just wrote lmao.
