Thread: [\[Guide\] Slaughter & Case Hardened Patterns | All you need to know.](#)

Lufasu - August 6, 2016, 10:05 pm

Hello HF , today i gonna make a cool tutorial about slaughter | Case hardened patterns.

I see that couple of people says slaughter patterns that dont even exist in the known pattern list , and pattern that i never see in my life .

So the only patterns that slaughter have, no more no any shitty unknown patterns.
Diamond -

Angel -

Phoenix -

Zebra -

Heart -

Thats it ! , there is no any other patterns ! , people inventors alot of "new" patterns to let you think that the knife its rare and make you buy it for an overprice .

You need to know that , this is the only patterns that slaughter ever have , those kitty / dogebone / white diamond / butterfly / , no one will buy a knife with pattern that you never see , just beacuse the pattern have the name "Dogbone / etc that i mention"

So , if you have one of this patterns , you must know ! those are not marketprice , so trade carefully and sell carefully.

How much overpay can you get -

Diamond

Pheonix

Angel

Heart

Zebra

Well , There is no exact number amount pattern adds to the price , patterns are personal preference means that when any man # 1 can offer you \$ 10 more , man # 2 can offer you \$ 200 more .

It's all about patience .

Example of some stupid guy that tried to bullshit me with new pattern that he invent -

[img]http://image.prntscr.com/image/5e66422bce93485e9e812ff8c786b378.png[/img]
He called it "Bat pattern" when its fucking pheonix pattern.

Case hardened -

It seems that every person has a skin CH must ask how much it is worth and the way he sometimes knocks description of " 100 % gold super rare ! " .

So let's get something clear first of all , the first thing is to know what colors can be in the CH and in this case there are only three .

Quote:Blue , gold , and gray (rust) .

The CH can be 100 % blue , 90 % blue , 80 % blue , 70 % blue , and so on .

There is no such thing as 51 % , 78 % , 47.5978 % , just no , it's going tenths that this is the easiest way to noticing how there , do not forget the percentages it only description the picture you put on , it's just like calling CH 100 % blue while the image clearly shows 50 % percentage exaggeration often will bring hatred and quarrels unrelated So beast without 54.5649845 % .

Now here's biggest Bullshit there , 100 % gold .

This sentence does not make sense because because because there will always be a combination of rust and gold , the gold will be able to never complete or perfect rust on the skin .

CH This is not a random mix , it's a picture of her location is different for each weapon .

Here is a picture :

Every time that skin opened from Case , is getting a different location in this picture .

You can see that 100 % blue entirely possible that there are enormous amounts on the left side , but 100% of the gold that is not possible because there is simply no , there is not enough and always will be next to rust .

Just because you have CH does not mean you should run out and search Price check , if you do not see a significant blue no benefit from looking .

Blue percentages such are the things that bring you a dollar more if you sell market but not more than that .

I hope that i helped you guys , and keep this in mind :).

Xzavyer - August 6, 2016, 10:54 pm

Nice thread. I actually learned some cool things from reading this.

Zorori - August 6, 2016, 11:14 pm

This thread was useful and I learned a bit I didn't know, thanks!

? TAQ ? - August 6, 2016, 11:43 pm

Thanks for the tutorial OP, useful for new players like myself, great share with the community.

G0hma - August 7, 2016, 12:12 am

Nice thread but imo you should've included some infos about the blaze pattern. Oh and no knife can actually be 100% blue.

MeltyNet - August 7, 2016, 12:15 am

Nice information thread, should teach anyone what the slaughter patterns are :)

Hanzo - August 7, 2016, 12:59 am

Thanks for this OP! I think alot of users will find this useful with trading and such :)

Lufasu - August 7, 2016, 1:08 am

Happy that i can help you guys :) , this guide also will help you to avoid bullshit from people.

SparkMasterTape - August 7, 2016, 1:20 am

how much will my ch be? the one the right is play side btw

Spoiler ([Click to View](#))

I know the right side its the PS , also uhmm im not familiar with this ch prices i just know about the patterns, i think you can get like 20++ beacuse its alot of blue on the PS on flipknife and its beatiful. Good luck fam !:)

EDIT -

Just asked my friend, he says you can sell this for ch collector and he will pay like 40++

Krave - August 7, 2016, 6:58 am

Awesome guide, thanks for this man.

this is a better guide, lol.

wow how old you are?

there is only 2 patterns that they focus on.

-.-
