I AM NOT THE CREATOR OF THIS BOT, THE CREATOR IS MACLONE I AM JUST POSTING THIS THREAD TO ALERT YOU GUYS THIS IS UPDATED. IF THERE IS ALREADY A THREAD THAT EXIST UPDATE YOUR LINK AND I WILL CLOSE THIS THREAD

Mr. Robot - August 7, 2016, 1:32 pm

Please always link the original thread for this when sharing.

Especially if the new megaupload when that comes out will be paying people who bring traffic on downloads, taking and reuploading their stuff is straight being a cunt.

Other than that - thanks for the share.

No idea what the original thread is. I'm against people not giving credits to the authors.

If you're speaking of the original thread on a different site then I cannot do that. Because I believe Maclone doesn't even have a HF account.

?

Yeah, it's from another forum. Vouch for this. I love masterball.

Also, here's coordinates for about 240 pokestops.

No worries man, if you need any help hit me up.

I much prefer to use masterball and snipe rather than full on botting with necro etc. I feel like it's less cheating. :p

Are we disallowed to link OC now?

Osuka - August 7, 2016, 1:46 pm

thanks for this OP really needed something like this and hated turning everything off in the config for other bots :)

Varane - August 7, 2016, 1:48 pm

This is exactly what i was looking for but can you recycle specific items?

Stevo - August 7, 2016, 1:52 pm

Btw, be careful when using this. I haven't ran into a softban with sniping but got soft ban from this. It did say that it removed the soft ban although I can't snipe rn. Might have to wait for a bit.

Although masterball is great, I do recommend! Just be careful familia!

Adderall - August 7, 2016, 1:53 pm

Thanks this is very useful for when I almost have no Pokeballs.

It doesn't man, you'll have to do it manually.

Not entirely sure what oc means. Original content? We aren't allowed to link to other communities iirc. Not sure why but it is what it is.

Yeah but your picture directly links to the site anyway and all the other threads linking owned were completely fine?

If you enter the ptc username and shit - check the xml file for where it says logintype or loginauthentication and change it from Google to Ptc
This is the stuff you need to change.

```
<?xml version="1.0" encoding="utf-16"?>
<UserSettingsXml xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
xmlns:xsd="http://www.w3.org/2001/XMLSchema">

  <DefaultLatitude>52.379189</DefaultLatitude>
  <DefaultLongitude>4.899431</DefaultLongitude>
  <DefaultAltitude>10</DefaultAltitude>
  <PtcPassword>pw</PtcPassword>
  <PtcUsername>username</PtcUsername>
```

```
<GoogleUsername>username</GoogleUsername>
<GooglePassword>pw</GooglePassword>
<ShowUsernameInTitle>true</ShowUsernameInTitle>
<WalkingSpeed>100</WalkingSpeed>
<Teleport>false</Teleport>
</UserSettingsXml>
```

Great tool, I swap between this, quickspinner and pokesniper and I get all the pokemon I need. Already level 30 so don't really want to level up anymore without it being too bait.

Thanks a lot for sharing! I was out of Pokéballs so my bot wasn't functioning properly anymore because of it and I didn't feel like turning off all settings in the config :)
