Thread: [How do you stop Vac kicks?](#)

Checkmark - August 7, 2016, 2:47 pm

Heya guys, I was wondering if there was anyway to avoid being Vac kicked. I've tried 4 payed, very high rep hacks but every time I use them I get Vac kicked every 15-30 mins. Can I stop this from happening?

SparkMasterTape - August 7, 2016, 2:52 pm

verify game cache and restart pc < how to fix vac erros
are u rage hacking in casual?

creki - August 7, 2016, 2:54 pm

Use like 50-60 FOV instead of full, if you're snapping to people you can't see you'll get a vac kick, unless the cheat has aim-step ofc.

Have you tried playing without cheats?

It might be some other program and not the cheat(s) itself.

It might be some other program and not the cheat(s) itself. I usually use Easy Frag and there is no Silent Aim/Fov settings to my knowledge.

Do every step for every Windows and then verify game cache. Also uninstall or don't run any of those programs while playing.
