Thread: [Cryptic's Private VPN Service | Build your own PRIVATE VPN!](#)

Cryptic™ - August 8, 2016, 1:57 pm

Looking for a fast, reliable, and secure VPN service?

Check out [CrypticVPN | Autobuy | No Logs | Portforwarding | DDOS Protected | Worldwide](#).

If you are interested in a private VPN, then continue reading.

I've been getting a large number of requests lately from people wanting private VPNs.

I've been selling private VPN services for the last 3 years, privately. Most requests were from my customers, or customers that refer their friends to me.

I am now offering this service to the public.

If you do not know what a private VPN is, a private VPN is when you are the only user using a particular IP or server. Your IP/connection is not shared amongst other users.

The benefits of using a PRIVATE VPN over a public/shared VPN is that you have control over 100% of the bandwidth/speed. Nothing is shared, your VPN will not go down because someone else is getting DDOSed. And overall, a lot more privacy.

You will provide the server, and I will set it up for you for a one time fee of \$10 USD. It will take me 5-10 minutes to setup your server.

If you do not know where to purchase the server or what specs you need, simply tell me the location and what you plan on using it for and I will point you in the right direction.

After I setup the VPN, I will provide technical support free of charge for the first 3 days.

This VPN is the worst I've ever heard of.

Nah jokes aside, I can vouch for Cryptic and his VPN. So far I was never disappointed.
