Still looking for vouch reviewers.

A frequently asked question that I was getting is that if you needed to have CS:GO in order to use these methods.

You don't need to have CS:GO purchased, just a Steam account. You're buying CS:GO items which go into your Steam inventory and don't interact with CS:GO in any real way.

Fixed the huge bug which allowed users to just click onto it and download the ebook instantly xD
Still looking to give vouch copies.
