Ninja is right... Sorry but Odus(the mod of this section) is currently away. If he wasn't theses threads would have been removed. Please stop posting them. If you're not going to listen then please make one thread with all of the source packs listed in their, you don't need to spam them.

Just close the old ones so no one can reply(there is a close button at the top right of your threads next to the thread rating). I am no mod, as long as no one can reply it will sink to the bottom of the

threads.

I dont think non-upgraded members can close their own threads.
