Thread: [\[GUIDE\] 5 cheap proxies for your bots, 2 day free trial on shared proxies](#)

PotatoBlood - August 9, 2016, 1:05 pm

QUOTE FROM THEIR SITE:

Quote:OUR PROXIES NO LONGER WORK FOR POKEMON GO. YOU WILL NEED TO FIND ANOTHER PROVIDER. STATEMENT POSTED: AUGUST 11th, 2016

They still work for me, been using them for a few days now, I guess some people ran 200km/h bots on them and got banned instantly

Here's my little guide on how to obtain a couple proxies, which work perfect for botting Pokemon Go.

1. [Click Here](#)
2. Click Pricing, Choose your desired region and one of the 5 PROXIES plans, they come with a 2 day trial
I recommend using the dedicated proxies, so you're sure you are the only one botting on it :)
3. Sign up, not sure what kind of paypal account you need, but it bills you \$0
4. Profit, use your proxies for 2 days and end your subscription before the next billing period.

Don't abuse this!! I recommend paying for an extra month, they offer cheap and high quality proxies!

Happy Botting!

Here's a screenshot of some of my bots running for 8h on these proxies:

SIM-403479 - August 9, 2016, 1:52 pm

How many you currently botting?

PotatoBlood - August 9, 2016, 1:56 pm

15, using 3 on each proxy, I recommend using the dedicated proxies, so you're sure you are the only one botting on it :)

Yeah, provided you don't use the same proxy on more than one account.

Fish - August 9, 2016, 4:24 pm

Sweet thanks for your help! It feels good to be betting again (after a 2 week break of being ip banned lol)

CapsBruh - August 9, 2016, 5:19 pm

Ok, so do you run your 15 accounts on proxies all on the same RDP?

I need to get maybe 5 going.. Do I need a RDP/VPS?

Spotify - August 9, 2016, 9:51 pm

Damn, wish they accepted btc, i aint gotta Paypal ._.

Yes, you can just run them at your homecomputer too, aslong as the proxies are set up correctly.

Niantec is fucking us up bigtime though, many people claim to be softbanned for 2 or even only 1 account per IP.

andreasx22 - August 10, 2016, 10:11 am

Not to sound like a cheap b*tch but I cant get 2 days free trail, want to test their speed and if they are good or not?

'Ben - August 10, 2016, 10:21 am

Just picked up a few proxies, no 2 day trial but I'm not worried about that.

For the price I have a feeling these are going to be shit.

Potato are your blazing proxies being blacklisted? two of the 5 i bought are already blacklisted without using them.

How many accounts are you assigning per proxy?

One, they're running fine now, one of the five i bought was just a dud i guess, but you can instantly replace each IP once every month, so got a new one and all are running very smoothly now, will report back after several hours. Might test 2 or 3 on one IP, we shall see.

How long does it take for the proxies to become active? Keeps telling me they are offline.

Did you buy a sub or package at Blazing? Go to your account area, and they will refresh within 2-3mins, and then you need to add your own ip to the authentication list and you're set to go buddy.

No problem - make sure in the future you leave it 10-15mins for your own ip to auth and for them to fully setup.

psyked916 - August 10, 2016, 11:26 am

Does anyone know how to cancel the subscription? for blazing proxy?

swords123 - August 10, 2016, 11:33 am

This is the owner of Blazing SEO (I was referred to this thread from a customer). Let me clarify some things:

1. We do not have a trial for our dedicated proxies. If you want to try and "cheat" the trials, feel free, but after 2 trials your PP will be banned on the semi-dedicated.
2. Semi-dedicated are not smart to use for botting Pokemon Go. Why? Because your proxy IP is shared with 2 other users, meaning if there is 1 (let alone 2) other of my customers doing the same thing, you all get banned. Yikes.
3. Our quality speaks for itself. Try them out for a couple days (the "cheap" dedicated proxies) and if you're not happy just open a support ticket and I'll refund you with no issue.

4. Necrobot seems to be causing issues with hard/soft bans lately. That's out of our control unfortunately. You can request an IP replacement to get another IP that will be hosted on a different subnet.

5. We will be releasing IPv6 proxies in the next 1-2 days for some beta testers. This is beneficial to you guys because MOST mobile users these days (which, Pokemon Go is a mobile app) are on IPv6 addresses. So when you connect from an IPv4 right now it may trigger a ban more easily, but once we get IPv6 then it should be a little safer.

And finally -- please open a support ticket at [billing.blazingseolc\[dot\]com/hosting/admin/supporttickets.php](http://billing.blazingseolc[dot]com/hosting/admin/supporttickets.php) if you have any questions. I'll rarely monitor this thread, so it would be better to open a ticket there.

Happy botting!

how do i use them for my Necrobot for example ? is there a setting in the config ?

Omarion - August 10, 2016, 12:07 pm
Purchase then from Blazing <http://bit.ly> [WARNING: potentially infected]/2aM9v5h - then enter them in the auth file, ip and portname, and change proxyauth from false to true then load the app.

why. Yours seems to be working very well

Update everyone -- due to all the demand, we created a special package for Pokemon Go users:

blazingseollc.com/amember/signup/pokemon-proxies

It is important to purchase this package because you will be put onto IP subnets that few other Pokemon Go users are on. If you purchase the semi-dedicated or dedicated proxies, you all will be on the same subnet and it will cause bans much faster. We are spending extra money to get these extra subnets for everyone so everyone can have a nice botting experience :)

Omarion - August 10, 2016, 7:42 pm

Vouch for blazing running ten all fine, upgrading to way more tomorrow.

You can always try to do your proxy replacements in your account.

EVERYONE: You can only use 1 PROXY per 1 ACCOUNT. Using anymore will result in a 100% ban.

I suggest using necrobot on slow settings, I've been running 25 accounts with no problem. You get way slower xp, but no bans.

Still managing 50k xp/h on a 12km/h walking speed, without lucky eggs

OUR PROXIES NO LONGER WORK FOR POKEMON GO. YOU WILL NEED TO FIND ANOTHER PROVIDER. STATEMENT POSTED: AUGUST 11th, 2016

BY blazingseoll

lol, is there any website work ????

blazingseo - August 11, 2016, 8:13 pm

That statement was specifically posted because too many, for a lack of a better word, "noobs", are buying our proxies and/or either:

1. Using more than 1 account per proxy.
2. Using FAST settings for actions

Both of those are easy bans and they blame my proxies for the cause of this.

For that, I have discontinued selling to Pokemon Go users except for a select few private users that know how to actually bot properly. Sorry for the troubles for anyone else who knows how to bot but now can no longer enjoy my proxies.

Yeah saw that to, shame since I am currently looking for a decent place to buy proxies.

blazingseo - August 12, 2016, 9:23 am

Anyone is welcome to contact me privately for a chance at our proxies, but you must provide information on how you are not, for a lack of a better word, an incompetent botter (speed, 1:1 account:proxy ratio, etc).

Simply submit a ticket here with how many proxies you would be willing to buy after testing a few for a day (I'll let you test for free) and the information requested above:
