Thread: [First ever project.](#)

DefiantHF - August 9, 2016, 3:20 pm

Hey guys, this is my first ever program that I coded.

It is just a simple spam bot, you enter some text and press "Start" and then it just keeps spamming the text and pressing enter.

Can anyone tell me why it has a false positive?

Legit took me like 5 minutes. I tried looking for the easiest tutorials. :D

Silicone - August 9, 2016, 3:21 pm

qihoo-360 is nothing to worry about

Dotexe - August 9, 2016, 3:26 pm

Really easy and simple, but since its your first program gj mate, keep it up and you'll go so far ?

My Computer - August 9, 2016, 7:40 pm

My first project in C# was the same thing also haha. But anyways, good job on creating your first project OP. ?

xenko - August 9, 2016, 11:49 pm

Shit, at least you finished it. I can't even get myself to finish my projects anymore. Which is sad but congratulations haha.

The question is, did you code it on your own, or did you watch a tutorial? ?

Whiteklaus - August 10, 2016, 7:15 am

That looks really basic but cool as a start. I have been trying to make a calculator as my first project. Could you send me the dource code via PM so i can learn how you did?

Younis Khan - August 10, 2016, 5:04 pm

How easy was it? What program did you use to make it? I'm considering learning C# so I want to know what my first project should be.

He used Visual Studio, and making a simple program like that isn't hard at all. Once you get the

hang of C# it won't be hard at all.
