Thread: [\[Helpdesk\] Bots and Sniping \(Do not ask me for Coords\)](#)

sLACKER - August 9, 2016, 5:33 pm

If you are needing help with your Bot set up or snipebot setup please feel free to post here.

I am tired of seeing such an ignorant price paid for accounts.

I know of some one giving away level 20+ accounts (maybe level 25+) so if that satisfies your needs, grab one Ill update with a link.)

If it doesnt, grab one and I will personally take you step by step on the installation, set up, and use of your bot, yes even setting up configs as to what you are trying to do!

please feel free to drop a reply or PM and as soon as Im back on line Ill help the first customer!

RockyMaivia - August 9, 2016, 5:40 pm

I'm trying to snipe using PokeSniper and it wants to set "Your current location" but I'm not sure if it wants where you are currently or where your bot was last botting from? Thanks for any help, very kind of you to offer assistance!

How long ago did you last run your bot?

if with in the last 24 hours I would say use the STARTING cordinates for your bot, if not use cords from around your house, to get those simply go to google maps and type in your address when it loads. Look at the url and itll show @xx.xxxx, -xx.xxxxxx use those.

any further assistance feel free to ask or PM ?

Best way to farm stardust with necro? When I farm for XP and its constantly catching pidgy and weedles and still which should be 100 star dust each when i go into the actual app it does not move?

CapsBruh - August 9, 2016, 6:44 pm

Just bought 5 dedicated proxies and I need to know how to set them up for running multiple accounts..

Do I need a RDP/VPS to run them all on?

Do I just download 5 copies of Necro onto the RDP and configure them with my proxies/account info?

I tried setting one up while I have a Haxton on my home network to test but on Necro I got an error and it would not start. Also tried running in Sandboxie.

Help get me started?

sLACKER - August 9, 2016, 6:52 pm

Im getting off for the night, will send PMs in the morning to help with any ones issues that are posted here between now and then.

METALSLUG - August 9, 2016, 7:10 pm

Hey bro,i have athread but no answer yetmaybeyour thread will get mesome answer :-) is there any android bots or snipers? I remember therewasonebefore the api change.

No, a VPS isn't required to run anything.

You need to copy the Necro folder 5 different times to run 5 at once. Then change the config in each separately to add the account and proxy info.

Thank you for answering this, I am not familiar with running more then one bot and am still going to research the topic so I am more informed on it. ?

As of now I have not heard of any android bots or snipers, normally they flood the sub forums with them, I will dig into it til I find one and let you know ASAP when I do! ?

and its constantly catching pidgy and weedles and still which should be 100 star dust each when i go into the actual app it does not move?

Some configurations have a "Do not catch" list... check that cause the fastest way to get star dust is to literally catch all the shitty pokemon that spawn EVERYWHERE. But also check these in config: Auto Power Up and "do not catch under xx cp / IV" that could be stoping you too...

some have these implemented for farming pokemon others dont.
?

sorry guys, me and my fiancé got our kid to sleep early today, hadda go get some mommy & daddy time in if you catch my drift :) (kept it clean cause im sure there is some little kids here somewhere)

XeRo MeRcY - August 9, 2016, 10:23 pm

Do you have any personal Necro configs? One for XP Farming? One for Stardust? One for rare Pokemon? Or any combo of the 3? I've been trying to tweak the settings and see what the outcome is, however I'm a bit confused of which each setting does in the config.json.

sLACKER - August 9, 2016, 10:35 pm

This one isn't bad. there are two configs there, one for exp farming and one for pokemon farming. If you adjust the catch options on the pokemon it should gain stardust quick.

put a fresh account on this set up 6 minutes ago and its over level 10 all ready, not the ignorant fast ones, but also doesn't get soft banned every 5 minutes either :balackhat:

mftzy - August 9, 2016, 11:46 pm

Can you give me the links with full of pokemon cords that works with pokesniper?

Don't mind it.

Edit:

I have some error with snipers it says 'PokemonGO.RocketAPI.Exceptions.LoginFailedException' was thrown. Can you help me?

Uncle Drew - August 10, 2016, 4:07 am

What's the best free sniper that's perfectly working for lvl 25+ accounts.

SL x TnT - August 10, 2016, 4:21 am

Invalid credentials.
Account lockout.
Account not verified.
A generic login error.

Are you sure your username and password are correct?

pokesniper2.

Bachanky7a - *September 5, 2016, 11:24 am*

Need help with sniping bro i'm level 24 only catch shitty pokemons 1000 as highest highest cp

METALSLUG - *September 6, 2016, 12:06 pm*

Is botting safe or nah, whats the updates? i havent been on here in a while after i got 4 accs ban

sLACKER - *September 6, 2016, 6:42 pm*

To be honest I haven't been around here much either been on the exact opposite side of hf in the crypto sections lol I'll do some research and dig up some Intel...

Will update shortly.
