Thread: [Unlimited Free Uber Rides | Uber Bypass \[\\$100+ in Rides / Day\]](#)

Verified Working: September 10, 2016

This is a method on how you can get unlimited free rides through the Uber app for Android/iPhone. I've used this method well over 20 times with no problems whatsoever. This shouldn't really be too difficult for anybody to figure out, but I haven't seen the method around anywhere so I figured I'd share.

Don't be a leech, leave a comment to keep the thread active. Feel free to PM me with any questions.

Spoiler [\(Click to View\)](#)

1. Sign up for a new Uber account with an iPhone/iPad/Android that has never been used to register an uber account. It helps to have multiple devices to do this with. Uber saves the MEID of your phone when you register so if you have a jailbroken phone or a rooted android you can reset and reuse the same device. Otherwise you'll have to use a new device or an iPhone/Android emulator such as BlueStacks each time you want a ride.
2. Open the menu and go to "Promotion Codes" and enter: "uberlriderforfree" (It will give you a ride up to \$20)
3. When asked for a card either use a vcc from Bancore.com, a prepaid card (vanilla visa, etc.) with at least \$5, or a personal bank card (since you wont get charged.) You can re-use the same number up to 3 times.
4. When asked for a phone number you can use Pinger.com to get a temporary number or download the textnow app on your phone for the verification code or of course you can just use an actual number. You will need a new one each time.
5. You can use a temporary email from tempmail, guerillamail, etc.
6. Rinse and repeat. Make sure the fare is under \$20 before taking the ride to avoid the risk of being charged.

Make sure you don't use the same driver more than once because they will probably catch on that you're using different names. They still get paid, but I wouldn't risk it. It will tell you who is coming to pick you up when you request a ride so it's not difficult.

Just as a side-note, they will take you through a drive-thru. Pretty nice when those edibles you ate just kicked in.

Don't forget to vouch if his helped you out. Have fun on your travels.

I don't think bancore vcc's are accepted now .

It stopped working like a few years back.

I haven't tried it recently though.

I know they worked when I first started using this method, I honestly don't know if it still works. I figured it would still help. Could you suggest an alternative?

THC - August 10, 2016, 8:30 pm

Used this method, and used different names as you said. Had the luck of getting the same driver under a different alias twice, didn't think to check, but he recognized me. Said I was using my friends account, kinda embarrassing LOL

Mr. Niceguy - August 11, 2016, 10:58 pm
If you use a prepaid card, I'm thinking you could just get a ride that goes over 20/50/100 bucks?
Because the driver won't find out until the drive is over..... or does uber notify the driver when it's not payng?

roshaanthebeast - August 11, 2016, 11:03 pm

What happens if it shows "United States" under free ride? That means i cant use it outside US?

Dr. Michio Kaku™ - September 8, 2016, 11:22 pm

Is this method universal?

I live here in India, will it work here.

This is easily busted, dont u think?

If driver decides to call us in case he cant find us, he would see an international number ?

I don't believe most drivers/people really think that hard about it.

We're ALL universal anyway, right?

Yeah I'm not sure where it's valid at, I think it's safe to assume that its U.S. only.

Any guidance how to reset the IMEI/MEID on a jailbroken device? Is there a tweak in cydia?

axlar - October 1, 2016, 9:09 am

thanks for the share OP ?

KazerTheAmazer - October 2, 2016, 6:50 am

Another addition to this method, you can open googlemaps and grab the Uber \$20 code from there also; thanks for the share, the same technique works with many companies I have found that offer trials etc :).

EDIT: Method works in Australia, but with googlemaps code.
