i tried it myself i was getting dratini but its not spammed in tons you need to spend some time to catch some dratinis its like 1dratini every 2min or so.

Edit - my bad didn't try that one maybe you try and give others the review of it. xD

What are you using to get these pokemon? Are you just setting the cords of your bot and letting it
grab random pokes?

illusionNXD - August 11, 2016, 4:25 am

you can do that or use nox/bluestacks and play around manually.
its better manually because bot will leave the area unless its configd for it.
