Arcanine 2900 CP , 90% IV ,move - Fire Fang - Fire Blast

You think it is rare?

Has a decent IV level and move set in my opinion. Only downside is the tons of water Pokemon that everyone seem to have. I haven't seen lots of grass Pokemon at least where I live.

Wow, that's actually pretty powerful. And yes it has the best moveset and one of the highest CP, bro.

Arcanine's highest achievable CP atm is 2984

By the way, where did you get that Arcanine? Did you catch it from the wild or did you just upgraded from a high CP Growlithe?

Also, what level is your account with this Arcanine?

I evolved a 98 IV Growlithe and got a powerful Arcanine. Every time I catch a Growliths now, I just transfer and power up the Arcanine. My account level is at a 29.
