Dont use nodisturbite it saves files.

Anyways majyx and pscan are great.

They do but they save file for their rescan feature, and there are rumours that they are an ESET honeypot

Hey guys,

is there any new good free scan site? I need one as fast as possible, majyx.net and pscan.xyz are down. :(

Better than opening a new thread or not? ? If I had found an answer on my question I would not have written.

Truthfully, the ONLY site i trust and use regularly is

<http://xcscan.com/>

1 free daily scan but the payment plans are literally dirt cheap...

no free web scan available atm, dont buy any crypters basically its not worth to do anything without scans, or if you have time install all avs and test it for yourself lol
