It looks trippy, i like it. Im not too familiar with this type of edits but it looks cool

Based Daddy - August 11, 2016, 8:54 am

It looks very vaporwave-esque. What kind of aesthetic are you going for? I get vapor vibes from you art, so I would maybe switch the font to one of these...

IMO would look better if "EPILEPSY" wasn't faded like that, but still looks cool. Good work man!

I agree with this. I think it would look better if it was differentiated from the background. Still looks really good though. ?

Not sure how much I like it, but I changed up the text a little.

What do you think? Better or a total no go?

I need to find something else imo

I would change the font and make it bolder, so it is more visible and "loud" for lack of better words.

Great edit! I believe this is a genre of music as well, this kind of edit is called vaporwave! It is a sub genre of music coupled with visuals! You're doing a great job, look for more references for better vaporwaving!
