Could you tell me what you know about socks so far? And in what context do you 2 need to start using it?

If you don't know much, have you tried to Google it to find out at least something? Or were you planning on trying to set up something, without knowing what that something is? Perhaps technical support @ your VPN service can point you towards the right documentation or help you with this too?

Simple :

Buy good ones, you can find a lot of it outside. And do not forget to wash them after you use them .
