Thread: [Your Favorite Pokemon That You've Caught.](#)

ZerFallen - August 11, 2016, 9:55 am

The question is simple, what's your favorite Pokemon that you've caught thus far? Levels don't matter, moves don't matter, etc.

Personally, it's a tossup between my Tauros and my Seel.

The two eevee that Pogo made me trespass to get when I first started playing. I named them 'Breaking' and 'Entering'

Ninetales definitely has to be the one that captured my heart:

Arcanine #1

But my strongest is Dragonite and best defenders are Lapras & Snorlax. I really love Arcanine as a Pokemon though he is a big cute fire dog whats not to love?

PirateAce - August 11, 2016, 12:21 pm

Blastoise :), but is very weak

Sigma - August 11, 2016, 12:39 pm

My favorite pokemon that I have caught so far has to be Charizard. He is not my strongest but he has always been one of my favorite pokemon.

I think I'd ejaculate a little if I got my hands on a Ninetails. Hands down my favorite Pokemon.

whiteknife96 - August 11, 2016, 2:06 pm

The Fro - August 11, 2016, 2:07 pm

100% Dragonite at 3.375K CP.

Yeah man, Dragonite's the strongest Pokemon after Mewtwo, and at 100% IV fully powered out there's nothing that can stop him. It's awesome. Usually have to revive him only once or twice to kill a big gym.

Been banking 100 Pokecoins a day for ages now my bag/pokemon upgrades are closing in on 500

SIM-1349466 - August 11, 2016, 2:25 pm

My most notable catches; Blastoise and Venusaur which were nigh impossible to catch.
Then 2 Kadabra's, 4 Dragonairs (transferred 2 cause they were CP 400 or less) and Lapras.

The "rarest" Pokemon I caught so far was a Venomoth :(Sad to say my Pokemon journey is not going so well. I'm a decent level I guess, Level 16.

D?ath - August 11, 2016, 8:00 pm

I gotta love my ninetails. Its not my most powerful pokemon which is actually my dragonite at 3k+ CP.

Toncekkk - August 12, 2016, 3:49 am

My favourite one is pikachu he is the best one

You really keep playing this game...

It's lonely out here for those of us who have never — and likely will never — download and play Pokémon Go. In a matter of a week, the augmented reality game has completely taken over the lives of children and full-grown adults alike.

Pokémon Go is not without its positive attributes. Due to the nature of the game, it's encouraged people to get outside and walk around, it's helped people with anxiety and depression, and, yes, it's prevented actual murder from taking place... Reputation who is with me :D
