Thread: [Best Stresser on the Market?](#)

Assailant - August 11, 2016, 3:10 pm

Hi all,

I have a package on RawDos, which is great, when it's up. It seems very powerful and does the job, but they have had a few updates etc recently so a lot of downtime. It's still great nonetheless. One of the best I have used.

So my question is, which stresser is currently the best on the market? By this I mean the most stable, and the most consistent power. I've purchased stressers before that can't even take down a home connection, that other stressers can with ease.

Thank you. ?

I know aggrons stresser is really good and I've used synstress before which never let me down.

I will check it out. I'm going to wait for other replies and see what other people think. Thanks for the reply.

do you happen to be in the year 2013 right now?

Yassuo - August 11, 2016, 10:54 pm

Tbh, Aggron's zstress is the best man hard hitting

I'm looking for the same information, the SST section is absolutely overloaded with threads and it's hard to choose which to go with!

I am just looking to take down 1 single website for a couple of hours each day (Monday - Friday).

Any recommendations? ?

What package do you have?

What do you use it for?
What do you think?

thanks in advance!

If I had the skills and capabilities of building a time machine, I wouldn't be asking which stresser is the best.

I'm more looking to purchase cheaper packages. I'm not really looking to do anything huge. I'll check out SynStress.
