Autobuy will be up tomorrow.

Got 1 vouch copy for member i find trusted
(Must be active in ewhoring section so he can leave honest review on this one)

Think of this eBook like this. Is it better to buy a fish or to buy a fishing rod and catch fish for the rest of your life? Same goes with packs. I really think this price is reasonable.

I received a vouch copy from the OP. I am not affiliated with him at all apart from this vouch copy.

The Quality of Information: 5/5 He goes into a lot of detail and very carefully explains each step, following this ebook you will easily be able to make your own packs.

Ease of Use: 5/5 So much depth is included it really couldn't be easier. Also, having multiple methods is great allowing you to repeat it as much as you'd like without difficulty or saturation.

Layout: 5/5 I was pleasantly surprised by the design, a lot of ebooks these days have very low standards in the books themselves and only focus on an excellent thread. However, this was not the case here.

Grammar: 4/5 Although I was met by a few mistakes there was nothing that I couldn't understand.

Just a handful of spelling errors.

Originality: 3/5 Although the methods are useful, they are also fairly well known and common knowledge to a lot of members however if you have never made your own packs before then this is a perfect book to buy.

Bonus Method: 5/5 Very useful and explains two methods perfectly both of which work well. Nothing more to say here except I'm glad I received it!

Thanks,
Ninesquare
