The quick spin method no longer works, check other threads for more information but Botting has confirmed soft bans now and speculation on perm waves.

I wouldn't snipe anymore if I was you or you will get banned.

The only bot method now is to use the most human like settings.

You can log in at least. Probably one of those temp ones, wait it out.

Dont snipe, I think niantic are releasing pokemon in places only a few people play and then seeing how many people catch that pokemon and if they are different countries then bye bye your account

Dont know bout you but i have my own way to snipe and not get soft banned lol

SIM-403479 - August 13, 2016, 7:24 am

It looks like the way to get rid of soft bans is no longer working.

If you now get a soft ban you'll have to wait like 24hours.

Not so soft anymore.
