Thread: [YOUTUBE AUTOPILOT SPREADING METHOD](#)

TripleOThreat - August 13, 2016, 5:02 pm

Another Spreading Method!

1. Get Visual Basic 2010 Express Edition
2. Make a Fake Program (For this one I did Roblox Money Generator)
So I did the logo the fake loading bar and a message after it was "Generated"
3. After thats finish bind your program with your rat and make sure it's FUD
4. After that make a video and use inspect element to show proof of this hack
5. Sit back and relax I had a ton of slaves in no time

Advantages: you get the slaves pretty fast

Disadvantages: 99.9% of them are kids?

DROP TABLE users - August 13, 2016, 10:51 pm

Nice! I did something like this before, but it was for "PSN" xD. Also why is it a disadvantage if it's a kid? Shouldn't that be and advantage?

Possible ?

nistokou - August 14, 2016, 7:40 am

Thanks for the trick lam a newbie And lam very bad for rat

lakyet1984 - August 20, 2016, 4:46 pm

nice tutorial ... thanks for sharing

yotoprules - August 20, 2016, 5:07 pm

The kid might have a gaming pc which you can mine on. Also you can bind a legit file to your RAT too, then you won't get comments saying that it is fake and people will share with their friends, etc.
