Thread: [Soundcloud Artists - Post your favorites!](#)

Vegeta - August 13, 2016, 5:08 pm

Soundcloud is one of the biggest places to listen to music, there are a ton of artists out there that you know that others do not. So why not show us who they are! I will be adding them to the list as they're posted below so it makes it easier for you to see what has been suggested without having to scroll through the whole thread.

I have already inserted some of my suggestions, now get to posting yours so everyone can see!

Please use this format when suggesting yourself/your favorite artist so I can add it to the list easily. If you're suggesting more than one, please make sure the links are correct so I don't get an error when looking at the profile.

CheGuevara? - August 14, 2016, 2:24 pm

May I suggest that instead of using spoilers, (you can still list it in alphabetic order) use a hyperlink with group/artist name? Like this,

[108 Tongues - Fuck Harvard](#)

Also shout out to all the bonesmen, even though I bet there are non on HF. ?

I can do that, but I rather keep the spoilers so it keeps it more tidy. The hyperlinking would help though, I will do that later tonight when I have free time.
