Thread: [Pastebin D3vSpider not working??](#)

Thinking - August 13, 2016, 9:10 pm

Hey guys is it just me or does pastebin D3vSpider not work?
it gets stuck at 0 or 1 percent.

It stopped working for me too.
I think Pastebin changed something.

It still works, but sometimes it gets stuck at "Crawling...". Try giving it a bit, or using it on a different computer/VM. It works for me as of today.

same here, works one time and after a couple searches stops again, and it stuck in "Wait .. Crawling" status...so bad :(

My private modification still works, probably a HTML tag change
