Thread: [Awesome way to earn btc no joke \(earn 3\\$ btc in 5 min\)](#)

creedypter - August 14, 2016, 10:34 am

Recently i have found a cool way to Earn Btc .

The method is simple to complex (not so complex)

Features

1)Earn every 5 min (i know every 5 min faucet sucks) (even this also sucks)
pay out rate of faucet 60-300 satoshi.

(Wait, this is not the main feature)

2)The main Feature is to earn..via survey and each survey which credits around each 100k satoshi
- 500k or more.

Note:- Some get more Survey is available according to your geo-Location

3)Referral: which help us earn 20%
(works worldwide)

But there can be a problem while doing survey (not sure though)
you got to use real info,i heard this from 1 of mine referrals (i have used fake one but still received the btc of 1.21\$ from 1 survey(length 2min)

4) Downloading android or iphone apps
payout rate of apps 40k to 80k

5)Get 20% more by watching their given twitch channel.
or Become a PARTNERED
and get 20% of what viewers earn back to you.

Please forgive me but i m a new member so i cant post a link in proper way

cashout is probably like 20€ so not worth it. You know 1BTC is 100 000 000 satoshis?

Do these surveys actually pay out or are they mostly broken or just ripoffs?

Also you don't need to put (delete) so many times in the link. Putting a space between the dot and the domain is good enough and doesn't take as long to remove. (Ex. google .com)

Yea they always say "answer honestly" and I do, and from my experience, most sites end up

making up some bullshit excuse not to pay you. That or their surveys are broken.
