Thread: [Get a US Phone Number For SMS and Call Verification \[\[Android & iOS \]\]](#)

Sebast010 - August 14, 2016, 1:58 pm

Hello everybody,

This is my first post here and I hope that it will help.

I use this App for SMS and call verification for most websites including Freelancer, Google, ...

It is called Primo, google it and download it (I cannot post links yet ?).

Pros:

- 1- works for most websites and apps.
- 2- you can make some free international calls.

Cons:

- 1- Sometimes it is slow.
- 2- You need a phone number to verify the app itself.

Well I must say, this service works perfectly where others don't always work as well. Thanks!

Brad007 - August 16, 2016, 12:14 pm

Sounds cool...ill check it out now. Thanks

simon01 - August 21, 2016, 9:14 pm

nice decent work good one

tron - August 23, 2016, 3:46 pm

This is rather LQ since there are a thousand apps out there like this anyone can find, and you specifying one in particular looks like you're shilling it.

Also the app might use the number you verify with as your caller id, so you're really not spoofing. Most of the public services are blacklisted for sms verification anyways, better to just get a burner sim.
