Thread: [Dioscuri RAT](#)

Pharmacist - August 16, 2016, 5:34 am

Sold the BlackHawk source, you might see someone selling it around here soon.

After I sold it, I started up another project: Dioscuri RAT

I'm attempting to make the stability the main focus of the project. There will be a free version with the following features:

Free version:

Code Password recovery (Chrome, FireFox)

Mail client recovery

FTP Client recovery

Anti-Virus Disabler

Malware Scanner

File Manager

DL&EXE (Normal, injection (RunPE), reflection)

Keystroke Logger

Multi-CryptoCurrency Miner (Create your own miner files) GPU/CPU

Torrent Seeder

Edit Hosts File

Website Visitor

.. More

And for the paid version (Donation, really):

Paid version:

Code Password recovery (Chrome, FireFox, others..)

Mail client recovery

FTP Client recovery

Anti-Virus Disabler

Malware Scanner

File Manager

DL&EXE (Normal, injection (RunPE), reflection)

Keystroke Logger

Multi-CryptoCurrency Miner (Create your own miner files) GPU/CPU

Torrent Seeder

Edit Hosts File

Website Visitor

Reverse Proxy

Selective Keystroke logger

Bitcoin Wallet Replacer (Searches clipboard for BTC addresses and replaces them)

Client Plugin Manager (Create your own plugins for the stub of Dioscuri)

.. More

Price:

\$15 (NOT A SALES THREAD, JUST ANNOUNCING WHAT THE PRICE WILL BE)

Screenshots:

Basically, I'm trying to give back to the community with the free version, and possibly make some profit with the paid version. There aren't any limitations with the free version, just the fact there won't be many updates, and there are additional features, plus more I'm adding so I go.

What is listed is already created, and are working. So it won't take too long to finish it, I hope.

Opinions?

Not adding remote desktop, etc.. I don't feel they are necessary.

Purple Kief - August 16, 2016, 6:01 am

Just do what you think is right.

Good luck.

Pharmacist - August 16, 2016, 6:08 am

Thanks and where can I find this purple Kief lol

bzr? - August 16, 2016, 6:33 am

Look forward to seeing this come about. Why have a free and paid, though? Especially when the paid is so cheap? Otherwise goodluck

Pharmacist - August 16, 2016, 6:38 am

This wasn't my original project. Now, blackhawk I would had happily sold it as there was a lot more features, but the guy made an offer that basically paid my first months rent.

Nick (Name) - August 16, 2016, 6:39 am

Torrent seeder! That sounds interesting and different! How does that work? I'm curious to know! ?

Stashyy - August 16, 2016, 6:41 am

Can't wait to see what it officially looks like. Keep us updated man!

Pharmacist - August 16, 2016, 6:41 am

(Aug 16, 2016 06:39 AM)Nick (Name) Wrote: [\[CITE\]](#) Torrent seeder! That sounds interesting and different! How does that work? I'm curious to know! ?

Basically Dioscuri scans for the torrenting software installed on their system, and runs a command line to download and start seeding your torrent.

ChromeHD - August 16, 2016, 6:42 am

Looking forward to seeing what the product looks like bud might buy it when released:P

Pharmacist - August 16, 2016, 6:45 am

So it's silent or not? In LL 1.4X and LuminosityLink it was not a silent seeder. One of the reasons it was removed.

Pharmacist - August 16, 2016, 6:53 am

I'm working on getting it hidden. As of right now, it is not.

Koopa. - August 16, 2016, 7:46 am

Bitcoin Wallet Replacer (Searches clipboard for BTC addresses and replaces them)

That feature might be hard to argue for it's legality if it was in a court.

SIM-3063187 - August 16, 2016, 7:58 am

Where is it coded in?

Or where Will it Be coded in?

Pharmacist - August 16, 2016, 8:05 am

Eh, not looking to be the most successful RAT that everyone's using. I'm not really that worried about it at the moment, if needed in future releases I'll remove the feature.

Koopa. - August 16, 2016, 8:07 am

Nice can't wait to the release version.

bzr? - August 16, 2016, 10:31 am

(Aug 16, 2016 09:23 AM)Pharmacist Wrote: [\[CITE\]](#) Take a look at the post man lol.

I'm well aware. Just selling something that you've copied partially from a leaked source seems eh imo. I guess as long as you've coded most of it should be fine

Pharmacist - August 17, 2016, 12:55 am

(Aug 16, 2016 10:31 AM)BzRk Wrote: [\[CITE\]](#) I'm well aware. Just selling something that you've copied partially from a leaked source seems eh imo. I guess as long as you've coded most of it should be fine

Actually I owned the source codes long before the were released publicly.
And I actually paid for them.

But that's beside the point, the sources, leaked or not, were very damaged and needed a lot of tlc. They also didn't include File Manager, Reverse Proxy, and I've had to completely recode the password recovery, so after the work I've put into it I don't feel as if I'm doing anything wrong.

im sorry i dont think the owner gave you permission to sell this.

Frankey - August 17, 2016, 2:23 am

That BTC address changed is a unique function! Never saw it in my life. Might buy it when it is launched, with what crypters is it compatible?

Pharmacist - August 17, 2016, 3:45 am

(Aug 17, 2016 02:23 AM)Frankey Wrote: [\[CITE\]](#) That BTC address changed is a unique function! Never saw it in my life. Might buy it when it is launched, with what crypters is it compatible?
Any crypter with that supports .NET 2.0+ and have self injection (Or reflection) will work with this. Also, there are a very limited amount of RATs out there that have that function, but there are a few.

I'm trying to go for unique features in this one.

(Aug 17, 2016 02:21 AM)Bibbly Wrote: [\[CITE\]](#) im sorry i dont think the owner gave you permission to sell this.
I'm sorry, It's also not the same RAT.

Bibbly - August 17, 2016, 4:34 am

you just said its based off of plasma rat.
aka you're stealing profit from others.
how about i just pm omni now for leaking

Clegane - August 17, 2016, 4:36 am

Really looking forward to see this when it comes out, think its gonna be great, but I really do think you should go for remote desktop or even hidden RDP, as they are really cool features and I

personally use them quite a bit

Kjetil - August 17, 2016, 9:24 am

This looks alot like plasma rat bro

did you base your rat of it? or is it just me being a dumbass :P

didnt read the full thread yet im sorry dont answer me haha

SREE - August 17, 2016, 9:29 am

Bitcoin Wallet Replacer (Searches clipboard for BTC addresses and replaces them)
this is a rare feature good thinking

¹³³⁷ - August 17, 2016, 12:01 pm

Do you have coded it or this is open source?

Pharmacist - August 17, 2016, 12:04 pm

As of right now I'm having problems with the ex-owner.

I'll update later, If I'm able to continue developing it for Hackforums.net, otherwise I'll be removing it.

You have asked me numerous times for permission to use the source. I told you no.

You don't have permission from me nor 4th Dimension.

You simply took the source and re-themed it. The feature list is nearly identical.

ehhh come on KFC. Or if you do might as well release for free then.. I just dont hthink kfc wants his source resold i think

Pharmacist - August 23, 2016, 10:30 am

Project will continue.

Currently I'm recoding the original file manager I added due to an issue downloading files. I've added Bitcoin address replacer, it is functional.

More updates as I continue.

When do you think will be the first release?

Gamer Fusion - August 23, 2016, 11:03 am

Love the sleek design, GLWS!

Pharmacist - August 23, 2016, 11:10 am

(Aug 23, 2016 10:51 AM)yotoprules Wrote: [\[CITE\]](#) When do you think will be the first release?

Hard to say, hopefully not long.

If it's not released this week, I don't know if I'll have it done for at least 2 more weeks. There's just so many little tweaks I want to do before releasing, on top of that I'm testing very feature after I fix/add it.

(Aug 23, 2016 11:03 AM)Endire Wrote: [\[CITE\]](#) Love the sleek design, GLWS!

Thank you!

Would you be interested in being a beta tester by any chance? PM me if so.

Nuirnxx - August 23, 2016, 11:31 am

Looks good so far! Good luck!

Ghzt- - August 23, 2016, 11:32 am

Looks good bud! ?

hamid147 - August 23, 2016, 2:59 pm

looks good and nice features... if you want someone to be your tester PM me

Pharmacist - September 5, 2016, 4:18 am

Sorry about the delay on updates, I've been working on this in my free time which has been hard to find lately.

I'm trying to update the GUI and give it a more modern feel, plus I'm adding graphs for different things to take up the wasted space in the settings tab.

Password recovery also seems to be broken, again, which was working perfectly the last test run I went through. There might be a different method of recovering passwords to be implanted, which should recovery many more passwords.

Ventriloquism - September 5, 2016, 5:10 am

Best of luck with your rat man. Looks nice ?

Kisame? - *September 5, 2016, 6:00 am*

Looks very neat! I would say, just drop the free version and put all your effort in the paid version. It's just 15\$ and it will spare you a lot of work.

If it is stable, has a smooth reverse socks and a reliable keylogger/passwordrecovery, people will buy it for sure bud. Good luck!
