Thread: [AMD Radeon settings.](#)

**dubgang** - August 17, 2016, 3:45 am

Hey guys just wondering if anyone could help me out, i have a AMD Radeon HD 5450 and i was wondering how can i get (atleast) the new crimson update 16.3.2 so i can use the newest csgo gaming option to play stretched without black bars on csgo !

16.3.2 version - [http : // prntscr . com / c6sun1](http://prntscr.com/c6sun1)

my version :( - [http : // prntscr . com / c6sux5](http://prntscr.com/c6sux5)

i dont know if my shit isnt compatible with the newer version (16.3.2) but if someone could help me out with this would be very thankful~

They dropped support for the 5xxx and 6xxx series a while ago. You would want to upgrade your GPU so you can get the latest drivers.

Yeah, because the driver you have now is the last one that supports your GPU.

You'll have to get a new GPU if you want the latest drivers.

If you want to use CS:GO with a stretched resolution, you'll have to go to the Display tab under AMD Radeon Settings, turn on GPU Scaling and set the Scaling Mode to Fullscreen. You should be able to do this with the drivers you have already.
