Thread: [Introducing DEV DELUXE \[Keylogger Coding Video Course\] \[INTERMEDIATE LEVEL\]](#)

Alskling - August 19, 2016, 7:44 am

So yeah, this will be like a mini-side project for now: an in-depth video course that is organized enough for a good learning pace.

Introducing Dev Deluxe, our online platform you can visit @ <http://devdeluxe.teachable.com/>

Learn how to access the course here on the video below:

(warning: excuse my voice, kinda high & jaded during recording, lol)

[Video: <https://vimeo.com/179461425>]

Note that as you register upon the platform you'll see that I've already uploaded two videos. First of which discusses what is the coverage of the course, and another which discusses what makes a great keylogger (very concise & informative stuff).

Preview of the course access (fuckin FREE yo!) :

Spoiler [\(Click to View\)](#)

Will upload the remaining vids within the following days. If you have comments or whatever, what to improve or anything that I got wrong within the recordings, just toss them in by posting here - I'll be happy to hear 'em!

Cheers.

BITCHLESS - August 19, 2016, 7:46 am

Awesome bro! Let's see this guide

Alskling - August 19, 2016, 7:58 am

(Aug 19, 2016 07:46 AM)Dramario Wrote: [\[CITE\]](#) Awesome bro! Let's see this guide

Tell me what you think man!

P.S. I wish you guys get to watch the 2nd video in that course, it's super informative about features, compatibilities and shit :)

Looks good. Waiting for more ?

6e756c6c - August 19, 2016, 9:33 am

You have a lot of background noise, you should consider using "noise removal" in your editing

software / Audacity.

Lunar? - August 19, 2016, 3:08 pm

Thanks so much! Gonna check it out

Batidas - August 19, 2016, 3:46 pm

Nice, free video course are always welcome. Thanks

Alskling - August 19, 2016, 6:51 pm

Currently uploading the video right now for the Development Environment :)

Thanks for checking it out guys!

Edit: Just uploaded vid for the Dev Environment.

lakyat1984 - August 20, 2016, 7:54 pm

thanks fir sharing ...its really help

Alskling - August 21, 2016, 11:28 am

Stay tuned.

Fine-tuned hooks, enterprise-level multi-threading; the hell can you expect.

Just a couple of tidbits:

- You can store up to 1gb+ size of logs in a .net string variable and still get it to work seamlessly.
- Threadpooled classes is more preferable and gives you more flexibility all other types of threads. Period.
- System.Threading.Timer is preferable and flexible enough for a great .net timer.
- Window hooks > GetAsyncKeyState
- Anti-CMD's, Anti-TaskManagers, Anti-AV's... all these features sabotage your keylogger's stealth.
- Counterintuitively, those ^ anti's are actually what makes the user suspect more about the possibility of a malware installed on his/her system.
- Much worse: most keylogger coded by skids actually won't run on all platforms flexibly: Vista, 7, 8.0, 8.1 & 10. Hilarious.

Cheerz yow

Freerunning - August 22, 2016, 10:56 pm

Waiting for this to get finished. Thanks a lot for this.

Alpha_Coder - August 24, 2016, 12:25 pm

Nice Thread Keep Up Bro :)

Alskling - August 24, 2016, 6:27 pm

3 vids will be up'd tomorrow, stay tuned.creating the project

making it hidden / invisible / gui-free

debug basics using debug.print (makes it easy)

app config to make it compatible w/ Windows Vista, 7, 8, 8.1, & 10

will be followed byCreating the god damn project (core configuration, framework compatibility, etc.)

Keyboard Hooks that works for x86(32-bit) and x64(64-bit) Windows Operating Systems

Clipboard Hooks (also works for 32-bit & 64-bit)

Note that in the first few modules we have discussed how much we should value efficiency, hence we're gonna go multi-thread this shit.

And I'm not talking about the regular/boilerplate template of multi-threads you regularly see in google results and stack-overflow threads (LOL) - we're gonna use threadpools. Threadpools of which are fault-tolerant, highly efficient and magnificent as fuck..

o0MRX0o - August 26, 2016, 5:43 am

nice .. Forums Needs Guys Like you :) Keep up the good work.

Alskling - August 26, 2016, 6:13 am

Just spent a good fraction of my day uploading the recent module, if you've signed-up already with your email you might receive something like this one below.. :)

(Aug 26, 2016 05:43 AM)o0MRX0o Wrote: [CITE](#) nice .. Forums Needs Guys Like you :) Keep up the good work.

Thanks for the nice words mate, I appreciate it.

Elitas - August 26, 2016, 8:24 am

Niceeeee! Stay HQ mate! Nice tutorial.

JavaDriveBy - August 26, 2016, 9:25 am

Good tuts ? Keep up the good work.

hackeando - August 26, 2016, 11:37 am

thanks fir sharing .. I will check it

JUSTIN - August 26, 2016, 9:44 pm

Seems cool, I might check it out :)

DONT USE ROCKETR - August 27, 2016, 5:49 pm

Posting to remember to check this out, thanks!

?Eatos - August 28, 2016, 8:26 pm

This guy is really offering what the .NET section is missing. Keep it up!

Älskling - August 31, 2016, 10:48 pm

Having problems w/ my ISP right now, but still recording every once in a while.

Will be back within the next days to come :)

Infinity. - September 12, 2016, 7:15 am

Just learn WinAPI, no need to do anything else.

Antbeast - September 12, 2016, 7:38 am

Very cool , my respect sir.

tweety - September 12, 2016, 7:23 pm

what fuckboi still codes malware in .net

Risitas - September 12, 2016, 9:01 pm

(Sep 12, 2016 07:23 PM)Tweety. Wrote: [\[CITE\]](#) what fuckboi still codes malware in .net
shit where is the malware.

Zenco - September 13, 2016, 1:04 am

thanks man, ill check it out later.

Antbeast - September 14, 2016, 2:35 am

Really cool. I will check this tutorials in future.

imanst0rm - October 9, 2016, 11:54 pm

Thanks for sharing ?

SirNoobHack - October 10, 2016, 9:22 am

Hej älskling!<3 Gimme kisses man

FluxHax - October 21, 2016, 9:10 am

Good chance to learn .NET doing cool things.

Sysmatic - November 23, 2016, 2:52 pm

This is nice.

Hope you will make tutorials about more stuff later.

VoidVex - January 29, 2017, 9:10 am

Thanks so much! Extremely helpful!

Only a handful of tutorials are showing up for me,can someone help? They stopped showing up at
"Code Configuration To Capture User Keystrokes"
