Thread: [Here is an actual batch file that messes with windows](#)

Once Timeless - February 24, 2009, 4:54 pm

<http://www.youtube.com/watch?v=HWoeU6WHyNg>

it will ruin your computer messes up everything just about.

+rep would be nice if enjoyed and used.??????

sevenfold - February 24, 2009, 4:55 pm

NOPE, NOT A VIRUS.

-Too short-

Fallen - February 24, 2009, 4:56 pm

HAHAHA; No its not. :|

Once Timeless - February 24, 2009, 4:57 pm

My bad but when you scan it will come up as one sorry.

because its using common techniques which are thought to work, ever run your batch file? It wont work. Neither will 90% of the ones posted, I used to go through every thread and explain why hehe

Once Timeless - February 24, 2009, 5:06 pm

I know but it is still worth making. Still fun.

(Feb 24, 2009 06:05 PM)cofusion Wrote: [\[CITE\]](#) lol it just wrecks windows so that windows wont work Not really, Access/Permission errors and some of the commands could be used better

Batch will never create any decent files that resemble viruses

Once Timeless - February 24, 2009, 5:15 pm

You should look at my other vids some are better this one was just made. Sorry if it does not work I am not going to run you can if you would like to though I know maybe my other vids deserve some +rep.

Comments appreciated

McAfee detects this as Detected: Bat/Kads (Virus)

iGnite - June 7, 2009, 6:44 pm

...Firstly, Your syntax is incorrect to delete any kind of system file...And your asking for +Rep from something that's been posted multiple times...and killing "Windows" system files is worthless for whatever the cause...but this thread is old anyway...
