Thread: [Question on Stressers](#)

Mitch - August 19, 2016, 9:51 pm

I'm posting this because i'm too lazy to check every thread in the SST marketplace. What is the most powerful stresser for your money atm? Strong enough to take down medium sized game servers and teamspeaks

Gigabear - August 19, 2016, 9:56 pm

Vdos by the one and only mr. apples

spooky hacker - August 19, 2016, 9:59 pm

Aggrons stresser and synstress are the best imo. If you're looking for something really cheap I'd go with k-stress but they don't have L7 I believe.

Pew ? - August 19, 2016, 10:00 pm

You ideally dont want to use a stresser for anything tbh.

TazerNips - August 19, 2016, 10:00 pm

I'd go with either Vdos, or Netstresser. Those are my personal favorites. I think that the support offered by Netstresser is best though.

Pew ? - August 19, 2016, 10:01 pm

vDos cant take down protected hosts.
Netstresser has no power.

Gigabear - August 19, 2016, 10:02 pm

You prob just wanna buy a dedi from my good friend Pew. That can take down all the hosts

TazerNips - August 19, 2016, 10:05 pm

Netstresser has no power.
Netstresser has plenty of power. I took down my ts3 that is NFO protected in a matter of seconds.

Netstresser is trash. I used to work for them and they're horrible.

Only complaint I have is Mons's english isn't the best lol. Besides that, they overcharge for just renamed packet types. Which is a bummer, but their power is no issue.

Pew ? - August 19, 2016, 10:08 pm

Wouldn't be surprised if you're one of the l33ts he hired for live chat. He's got about 2 already so.

Well I'm not, I just have a Netstresser subscription. And if we could have a legitimate discussion without degrading to "Oh you're just one of those l33ts" that would be great, thanks.

Lana Del Rey_ - August 19, 2016, 10:09 pm

I recommend vDos and Alphastress.

Drug Problems - August 19, 2016, 10:12 pm

Personally I would go with obtaining yourself a botnet

however if you are really set on having a booter, I would go with VDos

Gigabear - August 19, 2016, 10:19 pm

Ub3rs can't work with l33ts on SST related things and he's implying that mons doesn't care about rules of that sort. I don't think he meant to risrespek ur name

TazerNips - August 19, 2016, 10:20 pm

He negged me for this thread, stating "I don't know how you don't have more of these." So I guess stating your opinion is only okay if you agree with him.

SwixMods - August 20, 2016, 3:52 pm

vDos for sure, i should try it
