Ink7 - August 20, 2016, 3:11 am

Was helping out a friend by updating his personal logo.
Its made 100% from scratch.
Let me know what you think?

I want to do more lettering in the future so.

Would pay for something like this if I was not a designer myself haha.

Looks great!

But I have one tiny little thing that irritates me.

In the top left corner the indent curves like the ornament. If you look at the bottom right though the ornament is rounded and the letter rather triangular and it just emphasizes that slightly harsh indent.

It looks nice in my opinion.

Thank you all for the feedback guys.
It means a lot.

The only thing I don't like is the way the lines are connected, with those two thin lines.

Apart from that great work, love the light texture applied onto the Logo, and I like the minimalist approach you took to this.
Good work, keep it up, proud of you.

I like it a lot, I would definitely pay for quality work like this. What is his brand if I'm allowed to ask?
