Thread: [SmartScreen Bypass](#)

skidhackz - August 20, 2016, 5:31 am

This is a legit bypass of SmartScreen/ZoneID tagging of downloaded files, working on every version of Windows. And it is for sale.

You buy rat, crypter you have everything set, but your execution rates are too low, especially on windows 8 and 10 with that ominous SmartScreen warning. Ratting is nowhere where it used to be.

Now you can spread normally again. It allows you to execute your rat/keylogger/downloader without any prompts. This is not a ZoneID delete method, it's working right from the first execution. This is not the bat method either, (where you add "setup" or "install" at the end of the name) which didn't work for my Windows 7 when I was testing it.

For some reason this method will fail for a maximum of 25-30% of the systems. But it's no more than that, I tested this thoroughly. This percentage is random, not any specific type of users (eg. games, girls, older people, kids etc).

1. My instructions are detailed, everyone can do this, although I will provide support to those who need it.
2. I wouldn't call this an actual exploit but it certainly exploits Microsoft's carelessness.
3. It doesn't require any social engineering, the victim simply executes by double click. If he does, he is infected.
4. Don't ask me here what it is or what it isn't, I won't give out the method. You can PM me with your situation and I would help with more details if needed.
5. You are not allowed to leak the method, or give any hint about it whatsoever once you buy.

It's a genius method that will actually work.
Have fun!

Each and everything is stated in the eBook, How to do and what to do, Noob Friendly. However, this will not work for

25%-30% of systems. But Yes You can make this work for all the system if you got a brain !

Quality 10/10

The layout of this eBook is very simple and organized.

Ease-Of-Use 10/10

The author gives many detailed pictures that help the reader understand the method fully. It's very simple and easy to follow.

Originality 10/10

You will find this method nowhere else on hack-forums

Final Thoughts

This method on bypassing smartscreen is very smart and simple. I don't believe it will ever be patched by Microsoft. I guarantee that this method will work on your targeted audience. EX: Gamers

For only 15 dollars this method is very worth it as I believe it could sell for a massive amount of money.

May I ask why will this fail on 25-30% of the machines and what kind of machines are those?

I decided to change username now that I participate more, because the previous reveals some info I'd rather hide.

I edited the original post with some more info about the fail rate.I also added a BTC address.Thanks to those who bought it, for any support please contact me via PM only.

Added a discount if you buy the combo with my girls spreading method, 19\$ for both of them.

Added additional discount for review copies.

Gamer222 - August 23, 2016, 12:15 am

Last question, the do the 25-30% get the smartscreen warning or does the file not execute at all?
