(Jul 13, 2016 04:23 PM)Velvoc Wrote: [\[CITE\]](#) Hey everyone. I would advise this Keylogger to all of you, TITiger has worked hard to create this and made it cheap and affordable.

If your wondering why you should buy it?

He is not lying when he says you have full support he responded to me in no time and is Very Polite when doing so

Its Affordable most Keyloggers are 2x how much he is selling it for I would highly advise you buy it for its money worth

Easy to use :)

Thanks TTiger for creating this Keylogger

(Jul 14, 2016 12:29 AM)PROFIT Wrote: [\[CITE\]](#) Absolutely huge vouch for TTiger. This is simply the best logger for the price and covers everything that you would need. I haven't been able to find anything negative with this keylogger other than one thing - which is that your settings don't save after closing the program, which will probably be fixed in the future. Everything is very clean looking and easy to understand and use. One thing that I really like about this keylogger is that it doesn't have to be used for bad purposes, there is clear support for this as you have the ability to enable a notification when the program is run. Currently scans at 3/35 without even being crypted. Logs are very clean and easy to understand. I highly recommend purchasing this, you will not regret it.

My rating: 9.5/10

(Jul 15, 2016 10:26 AM)packetsfam Wrote: [\[CITE\]](#) Another HQ product made by TTiger...

Instantly, I was comfortable using it due to the fact that the GUI was so clean and straight forward. The SMTP delivery logs were sent at the exact time I chose and each of the features I enabled worked very well. The Screenshots settings are very nice. Both timed screenshots and 'trigger' word screenshots worked great, and I also received each screenshot in my logs simultaneously; awesome feature.

Everything typed was logged properly and in order (nothing was out of place) which was very nice. I just wish it would show when the user Backspaces in the middle of typing a sentence with a simple [BACK] or something similar in the middle of the logs, to make some phrases more legible when monitoring somebody who may mistype a lot of words often. Ignore that, just found the feature for it, and it works fine! Other than that, the System Information, IP Address, and ability to personalize the client's name is very useful. Lastly, everything is organized very well and the logged clipboard text, logged processes, and screenshots added to the end of the logs are all a nice touch. The built-in browser is also a very nice addition..

Looking forward to continue using this. Can't wait for the updates in the near future. GLWS!

(Jul 15, 2016 01:17 PM)Dutch_Apple Wrote: [\[CITE\]](#) Great product as always, 100% worth the surprisingly low price!

All the features work as advertised, just as I expected them to without any issues ?

Looking forward to more effectively monitoring my business network and I can't wait for the new features you plan to add in upcoming versions :D

GLWS, you deserve it!
