(Aug 1, 2016 05:53 PM)Devil Dog Wrote: [\[CITE\]](#) So, I have nothing but good things to say about this program. I honestly think it is better than the other one I previously purchased at 4 times this price for only a week license. I would highly suggest anyone that needs an email bomber to look here. This is the cheapest and best. Only downside, which really isn't one if you're not lazy like me is you have to use this: instead of just typing the amount in.

I have few questions

1, does this send unlimited emails or has limit?

2, do i need smtp or it has inbuild smtp server?

3, can it be used in vps ? And what if the vps server went down can i use in another vps???

Senor Suave - August 23, 2016, 1:01 pm

This is one of those products I really don't need but I want just to screw around. Imma look into it.
