Thread: [UFC 202 Full HD Stream - Best quality stream](#)

I myself can't watch the 480p stream being linked here so I thought I'd share a good quality stream with you all. Only problem is it being banned sometimes so the host has to refresh the stream which takes like 10-20 seconds.

Enjoy the best quality HD stream!

Thanks so much for this :)No problems dude! I find it annoying though with it being banned like every 2 minutes or so, hopefully the host will fix the issue permanently.

Although there's a quite similiar quality Acestream if anyone of you wanna watch it through VLC instead: 2984cd118a04d4a0ec37e1cb35b14891319e3c03.

Am sad now.It's not stuttery nor laggy for me, the only problem is it being banned.

Download Acestream and use this instead and you'll have a smoother stream which wont be banned: 2984cd118a04d4a0ec37e1cb35b14891319e3c03

Host said if his stream gets banned one more times he's fixing an SD stream instead like the rest of them, it'll be lower quality then.

If you still wanna watch with high quality use the Acestream content ID I linked instead.
