Anyone being using nox in the last couple of weeks to gps spoof? If you have any soft bans or have u being banned from just using nox and doing it close to where you live?

Been playing on both cell phone and nox - same acc.

No bans yet

Used nox in range of 100km from my place

No bans with Nox here yet. I'd be careful though, change your Device ID and resolution.

Some ppl did get banned with Nox only, so care :) Nox shows at kernel no matter what u change so I'm sure all accs get flagged to be banned at a later date

Well idk I feel like it isn't even relevant. It doesn't seem like Niantic even know how to control these bans.
