Thread: [Prestashop Backend with SuperAdmin access](#)

glglgl - August 21, 2016, 11:23 am

Hi,

So let's say I have a superadmin access to Prestashop store (1.5.6.0) (username and password). Any tips how to get other passwords of the rest of admins?

PS: As always, please, delete this. I realized I was that stupid to login there in past using my home connection. This isn't going to work. I slapped myself. pls close this, and move it to trash. So sorry to waste another thread. Shame.
