NoStrangerToDeath - August 22, 2016, 8:36 am

Is this a downloaded program or a site? Seems like a nice program next to this error than :P!

Cheers!

Maybe it just found a lot of beedrills

Fish - August 22, 2016, 8:47 am

i get the exact thing, annoying af. it shows like 10-20 of the same Pokemon at relatively the same position, when the bot tries to snipe it nothing gets caught

PacketBuster - August 22, 2016, 8:47 am

Since some hours I have this stuff all the time, no matter what pokemons and the worst is that they arent even at the given location

Above and Beyond - August 22, 2016, 8:54 am

It pulls data from discord channels so it's probably someone just being a dick. You can chose to filter out certain Pokemon so if this happens just filter them out for a while.

SIM-1425504 - August 22, 2016, 1:47 pm

Any chance the program is running through skiplagged's api?

ScorpionOfWar - August 22, 2016, 2:06 pm

Of course... lol IT says "Verified"

GerhardT - August 22, 2016, 2:16 pm

Dont use any feeder it will bann you now wrong time for it

LionHeart~ - August 22, 2016, 2:33 pm

Heh this is why you need to configure your shit to filter out pokemon.
