Thread: [Targeted Spreading to GIRLS | The smart way](#)

skidhackz - August 22, 2016, 12:46 pm

I'm selling this spreading method that works on girls specifically, it's targeted spreading through social media like facebook. I see that girls are a popular target for rats so I decided to sell this.

This is a smart way with almost zero effort that takes advantage of women's psychology and guarantees results more than anything else I have tested. You won't need to be having a conversation in order to infect them.

This is simple, yet high quality. You will be smiling when you read this and realize beforehand that it will work. It requires access to a social media account, yours or other's. One is enough because soon you will have access to most accounts of those who got infected. The spreading then is exponential. You can use the method even without access to a social media account but it needs some prework, maybe 10 minutes.

I suggest you also buy the SmartScreen package unless you have a good doc exploit. If you don't have either the infection rate will be lower.

This is for testing purposes only, like social experiments etc. I have no responsibility for your actions.

This method I would have never thought of. It is actually genius.

10/10

Simple package: The spreading method only | Price: 7\$

Combo package: The spreading method and my SmartScreen bypass method | Price: 19\$

Whoever promises a review of this after buying will get it at 20% discount, for any of the 2 packages.

I'm offering 3 vouch copies, preferably to L33Ts and UBERs but I mostly care for high quality members.

Only for sending the rat, not for chatting and SE them.The first and only message is enough for this method to infect them, they will want to open it, very much so, whether they know you or not.

If you have any more vouch copies available I would be glad to take one so that I can write my opinion on this.
