Thread: [I may found a bug in the reputation view](#)

Weco - August 22, 2016, 3:27 pm

The rep of [???? ????](#) is in the reputation view on the left instead of the right side of the name and the brackets are weird.

I hope this is the correct place for a Thread like this.

Ooze - August 22, 2016, 3:28 pm

Is that for all of his reps?

Link his profile so we can see for ourselves

Weco - August 22, 2016, 3:29 pm

Yes, its for all. And I linked it, click on his name.

J?son - August 22, 2016, 3:30 pm

Not really a bug, it's just the characters he is using.

SoulZeh - August 22, 2016, 3:33 pm

Only seems to be on that one person, I just checked through the reputation.

Congratulation you unlocked an achievement!!!

Covalent - August 22, 2016, 4:04 pm

You used my rep as a example funny guy XD

This is like this because its one of those languages like arabic that is read from right to left and starting on the right side instead of left.

The language is Hebrew.

TyrantKingBen - August 22, 2016, 4:07 pm

This has been discussed before, can't remember the reason to how this happens though.

SIM-2696289 - August 22, 2016, 4:08 pm

This is normal.. its just because of the language. Happens with Hebrew and Arabic characters.

FiftyTwo - August 22, 2016, 4:16 pm

AYYYYY IM IN THE PICTURE MUM GET THE CAMERAAAAAAAAAAAAAAAAAAAA

Confound - August 22, 2016, 6:15 pm

Hebrew reads from the right to left. That is the cause for this.

Lord_Jesus - August 22, 2016, 6:17 pm

(Aug 22, 2016 03:32 PM)Yani Wrote: [\[CITE\]](#) Isn't it the special character that's used to spoof filetypes?

It's hebrew. The special character was like a sword.

But like the user above said, it's hebrew, and hebrew is written from the right to the left.

Carl Elias - August 22, 2016, 11:10 pm

This has happened before and I think but am not sure Omni said anyone who has a username which breaks that page or anything like that gets a warning but I don't remember.

There was a time a while ago where many users used special characters in their username that caused bugs like this.

-Ty

Edit:

From the [Help Docs](#):

13. Profiles should not have special character which break or alter HF layout.

Brilliant™ - August 23, 2016, 12:54 am

I think it's just a visual glitch, can't be on all browsers though.

minimalist - August 23, 2016, 1:03 am

RTL characters break HF's layout and the guy will likely get repkilled for it.

Damn I was about to find out if there was an invisible character way of doing this so I can keep my username but make the rep/username switch places.

Omniscient - August 24, 2016, 1:59 am

Thank you for reporting.
