FAQ

Q : Did you have AntiBotKill ?

A : Yes Spectral protects its self.

Q : Do you have a recommended host?

A : No but we recommend you use a webhosting package or a VPS with alot of memory.

Q: I just got the panel info, how do I install it?

A: 1. Create a database call it spectral
2. Upload the php to the www directory of your site
3. For spectral's database import "spectral.sql"
4. send us the full gateway and we will create your build

Q: Captcha isn't loading?

A: Install GD Mod

Not quite true. Only windows vista and 7 have .NET 2.0/3.5 already installed. Windows 8/8.1/10 have 4.0/4.5/4.6 so your file will not work on those windows versions unless they install CLR v2.0 (.NET 2.0/3.0/3.5). Anyhow GLWS

@Russ since you are the coder, can you explain some things to me.

Encrypted Connection - How is it encrypted, what algorithm and where are the encryption key stored?

How do you achieve anti deletion and persistence? Do you inject remote persistence threads into other running processes.

About hiding reg key, is it using hooks to achieve that? Is it just hidden from msconfig or from other programs too.

Thanks for answering.

Spectral's php and stub are currently going being completely recoded, for now Spectral 1.0 is available to sell. If you need help installing the panel contact Pew. If you have issues with the stub or need a build contact me.

In recoding the stub I hope to drop the kb down to mid 20's or low 30's. Currently the panel sets up extremely easy locally - we have ran into some issues with hosters but we are working to get them sorted out.

Any features that you want added in can always be added in for a certain price.

Cheers.

Guys, LuckyMr7 is selling this project, that's probably why he's currently ignoring questions. You should wait until the project gets sold (or until LuckyMr7 decides to keep it) or just look for another net.
It looks like a very promising botnet, but in my opinion it's better to wait and see what's going to happen with SpectralHTTP before buying.

Okay this just doesn't add up.

You're selling a fully functional C++ HTTP botnet for \$15?

Explain.

SexualSensing - September 15, 2016, 1:26 pm

Opened a dispute. Im tired of waiting, when i receive a PM with a form of contact because I dont have 25 posts yet, I will as a mod to take this down..

Most likely he is awaiting you to contact him. You don't have 25 posts , that isn't his fault.

Not trying to sales trash or anything. But who in there right mind would sell a c++ botnet that is stable for \$15.... That's eBook price..... Like look at beta a few hundred easily one of the best hf botnets.

While it's true that getting 25 posts to PM is easy, that's literally NO excuse to exploit him because he's unable to add you in the dispute database or PM you.

He's posted in your thread several times, without "sales trashing", while you intentionally ignored him and chose to respond to other members. The reason you chose to ignore him was because he (understandably) thought you were a scammer after no contact in 48 hours.

So instead of delivering the goods and asking him to remove the negative posts like any business-sensible person would, you totally ignore him because you're easily offended and childish. And then, the user PMs you apologizing and simply asks for his delivery after meeting your demand that he got 25 posts and PM'd you. You totally ignore him again and ACTUALLY choose to become a scammer.

Use YOUR brain, by simply delivering the product all negative posts would be edited/removed, scam report removed, and rep edited. You're losing sales and reputability because you want to be a 5 year old and have your way.

DWC user is HIGHLY likely a scammer or a part-time scammer who only scams new members because he can get away with it.

Not even an attempt to justify scamming? Just pointing out a faulty trust scan?

Is this where your exit scam comes to an end, and you just admit to your actions and take your ban up the ass?

Doubt its faulty and I've never scammed anyone who has purchased this product. If you have any questions about my product feel free to ask. Otherwise your posts will be reported for sales trashing.

Actually that's a blatant lie. To all potential buyers, I strongly encourage you to check out posts from me, LuckyMR7 and SexualSensing on this thread. For your convenience, I've linked them for you:

[SexualSensing's first post asking seller to PM him the product](#)

[Almost 48 hours later SexualSensing thinks he's been scammed:](#)

[Seller replying to someone else but not SexualSensing](#)

[SexualSensing asks once again](#)

[SexualSensing posting a dispute](#)

[The seller's response to SexualSensing's scam report and other skeptical users](#)

[SexualSensing following the sellers instructions to get 25 posts and PM him](#)

And still to this date, the product hasn't been delivered and the buyer has yet to receive contact from you in response to his PM.

(Sep 18, 2016 09:30 PM)LUCKYMR7 Wrote: [\[CITE\]](#) If you have any questions about my product feel free to ask. Otherwise your posts will be reported for sales trashing.

Please, report our posts. I beg you. That way, we can bring more moderator attention to the factual evidence given that you are a blatant scammer.
