Thread: [-40% SmartScreen Bypass | Spread to HOT Girls | Wifi Spreading | Scantime FUD method](#)

skidhackz - August 23, 2016, 4:09 am

\*\*\*\*\*

The price for everything (Smart screen bypass, Girls spreading, LAN spreading, Scantime FUD method) is \$16 <https://selly.gg/p/7589e73f>

\*\*\*\*\*

[Previous thread #1](#)

[Previous thread #2](#)

\*I joined all threads into this one. The reviews posted on first few pages here are about the Girls spreading method unless it is said otherwise.

\*I joined all threads into the Girls spreading method despite some flame here. Each one can judge and draw his own conclusions.

Vouches for Smartscreen Bypass:

(Dec 22, 2016 12:02 PM)Fortunate Wrote: [\[CITE\]](#) Vouch for this product. Totally worth the money.

(Aug 22, 2016 08:38 AM)Katarina Du Couteau Wrote: [\[CITE\]](#) Vouch for this eBook.

Normally eBooks are shit, but this one works :)

Its a genius method that will actually work.

Have fun!

(Dec 14, 2016 08:44 AM)IT IS SHACO Wrote: [\[CITE\]](#) Thank you for the ebook !!!! The method for bypass smartscreen works !!!! Ty man

I trust on this seller :)

(Feb 18, 2017 10:39 AM)? [\$(1000)\$] ? Wrote: [\[CITE\]](#) The spreading rate with the smartscreen bypass is quite impressive. I've got way more slaves than usual.

(Dec 16, 2016 05:12 AM)accelsol Wrote: [\[CITE\]](#) I am so happy to work with a person like you. Not only your e-book has been helpful, but the kind of H Q support you are providing is priceless. Looking forward for more and more developments from you. Would really like to work with you again.

Thanks a ton.

(Aug 20, 2016 09:42 AM)L????? Wrote: [\[CITE\]](#) Before I start this I would like to thank skidhackz for giving me a vouch copy of this ebook.

Quality 10/10

The layout of this ebook is very simple and organized.

## Ease-Of-Use 10/10

The author gives many detailed pictures that help the reader understand the method fully. It's very simple and easy to follow.

## Originality 10/10

You will find this method nowhere else on hack-forums

## Final Thoughts

This method on bypassing smartscreen is very smart and simple. I don't believe it will ever be patched by Microsoft. I guarantee that this method will work on your targeted audience. EX: Gamers

For only 15 dollars this method is very worth it as I believe it could sell for a massive amount of money.

## GoodLuck with Sales SkidHackz

(Aug 24, 2016 06:30 AM)Codefuser Wrote: [\[CITE\]](#) I can vouch for this, I have known this method before but then he revealed it to me and I know it works. It is easy to use and it does not involve certs.

(Aug 20, 2016 11:10 PM)PaaShA Wrote: [\[CITE\]](#) I just got my copy , It works fine . Its not really a method it's an idea came from a smart brain which does work!

Each and everything is stated in ebook , How to do and what to do, Noob Friendly. However this will not work for

25%-30% of systems. But Yes You can make this work for all the system if you got a brain !

(Aug 23, 2016 04:23 PM)extrimboy Wrote: [\[CITE\]](#) Good method, well explained, with pictures and stuff... Thank you skidhackz...

## Vouches for Hot Girls Spreading:

(Aug 22, 2016 01:25 PM)jujuger Wrote: [\[CITE\]](#) I received the vouch copy and OP is obviously experienced in this field of social media.

This method I would have never thought of. It is actually genius.

10/10

(Feb 18, 2017 10:39 AM)? [\$(1000)\$] ? Wrote: [\[CITE\]](#) I didn't test the girls spreading but it's a quite clever method. Most of the females will certainly fall for this.

(Aug 23, 2016 02:38 PM)YinYang Wrote: [\[CITE\]](#) Ok, well out of nowhere OP sent me this method, I didn't ask for it but it works.

It will have a pretty high success rate, but you won't be able to do this in the masses. This is a person by person (possible group of friends) method.

The English is a little off, however, it does work, so you have my vouch.

(Aug 24, 2016 10:26 AM)Kingpin Owner Wrote: [\[CITE\]](#) I just received a vouch copy of this. I can say it is very detailed and tells you every single step. A really good method overall! It can be real fun ;)!

(Aug 24, 2016 08:24 PM)?Opulence Wrote: [\[CITE\]](#) I can say that if you are specifically targeting girls this method will work. It does require some patience and you may struggle at first, but the concept is spot on.

## Vouches for Wifi Spreading:

(Feb 18, 2017 10:39 AM)? [\$(1000)\$] ? Wrote: [\[CITE\]](#) The wifi spreading works really well. It should infect the majority of systems in the network.

If you want to pay with XMR you can use the above address.

One last thing.If you check my REP you will see this:

This user never bought anything from me, you can PM and ask him to justify this

<https://hackforums.net/member.php?action=profile&uid=1331143>

**AP?X** - August 23, 2016, 4:43 am

Vouch copy? I will write a detailed, honest review if your willing.

**y.flicka** - August 23, 2016, 4:45 am

I am intrested in a vouch copy aswell

**YinYang** - August 23, 2016, 5:05 am

(Aug 23, 2016 04:46 AM)rbrtr Wrote: [\[CITE\]](#) Fucking broke boys can't afford \$7 smh

A vouch copy is to prove the legitimacy of the product, which s why it's usually given to HQ, reputable members.

**V For Vendetta** - August 23, 2016, 12:22 pm

I have received a vouch copy. My review is as follows:

I have never read a method this terrible. I could barely understand the message he was trying to convey, and after reading it multiple times, the method is a waste of time. Yeah you'll get female slaves but the effort for barely any slaves isn't worthwhile. You'll have more luck going after random slaves rather than attempting this. I would not buy the method (or at least what I understood of it).

Sidenote: I received a .docx and the thread mentioned something about a doc exploit. To everybody who purchased, I'd recommend running an antivirus.

Regards,

V For Vendetta.

**skidhackz** - August 23, 2016, 12:37 pm

I respect your honest opinion but I can judge it too:

1.Do you think I would be so dumb to mention doc exploit and try to infect you too?The default filetype when I saved it was docx and didn't change it.I think you are confusing .docx with .docm.I mentioned doc exploit here too, as a way to have more infections by avoiding SmartScreen if you

don't want to buy my SmartScreen bypass method.

2.You didn't understand the message conveyed?That could be your fault, not mine.Everyone can see the feedback I've got so far for all my methods, including the Free Fud.Being your fault is supported by your next argument, that you will get few slaves for your time.Do you understand that this is a targeted spreading method?You can't mass spread and have HQ slaves, you clearly don't understand the goal here.The effort by itself is minimum by everyone's standards.This is not an automatic method, it can't be, again, it's targeted.

3.I think this is sales trashing.Do you have a friend selling something similar or am I too suspicious?What is more probable?Me being paranoid or you incapable of understanding BOTH the purpose of this AND the technique which is overanalyzed and overdescribed in the eBook, even for the dumbest to understand.I'll leave it here.In fact I will offer 1 more vouch copy just to prove my point.

**V For Vendetta** - August 23, 2016, 12:42 pm

1. Just an observation; never accused you of anything.

2. You'd get more slaves going on a teen forum/teen chat/pregnancy forum and getting female slaves. This would literally get you 1-2 female slaves a day, which isn't worth anybody's time.

Also,

Quote:Do you understand that this is a targeted spreading method?You can't mass spread and have HQ slaves

Have you ever spread a RAT before? You can easily mass spread and have HQ slaves, just don't be a 12 year old idiot.

3. Your grammar and spelling is atrocious (in the e-book). Also, it's not sales trashing but an honest review of your e-book.

**skidhackz** - August 23, 2016, 12:51 pm

Also,

Have you ever spread a RAT before? You can easily mass spread and have HQ slaves, just don't be a 12 year old idiot.

3. Your grammar and spelling is atrocious (in the e-book). Also, it's not sales trashing but an honest review of your e-book.

How is it not a sales trashing when you replaced each of your arguments?

1. You imply that I could be infecting users because I mentioned an alternative for people who don't want to buy my Smartscreen bypass method and because of your confusion about .docm/.docx. This is based on wrong observations and you never took it back, even if I explained.

2. Again, I'm sure you can get the slaves from the forums, but I'm clear as to what I'm offering. I'm offering a targeted spreading technique, so you can spread through social media to selected victims, known or not, NOT random people. So what you are saying is irrelevant and you didn't get it even if I explained above.

3. So this is the grammar now? I doubt it's atrocious by anyone's standards as I have a degree in English, though clearly it's not my first language. How is my grammar here? Maybe it wasn't me who wrote it then, yes that must be it.

Me proving you wrong didn't make you reevaluate your "arguments", instead you added more. I think I explained enough, everyone can judge on their own.

Edit: Actually now that I'm reading again what you wrote, your review is positive. You said the method gets females, that's the goal for targeted spreading, to get specific females, not many and random. The problem with targeted spreading is that there is a very small chance of infecting them, that's why you use mass spreading so to have a large sample. And that's why you need a smart method. So if you're saying that this method gets targeted females then I need no more.

**YinYang** - August 23, 2016, 2:38 pm

Ok, well out of nowhere OP sent me this method, I didn't ask for it but it works.

It will have a pretty high success rate, but you won't be able to do this in the masses. This is a person by person (possible group of friends) method.

The English is a little off, however, it does work, so you have my vouch.

**skidhackz** - August 23, 2016, 2:49 pm

Well since not enough members I can trust asked, I decided to choose myself :)

I want HQ members and honest reviews, I'm not here to sell shit promoted by fake reviews.

Since you mention it too I will review my English on the eBook and update it as it seems I didn't pay

too much attention on the grammar.Thanks for the review, added to original thread.

**V For Vendetta** - August 23, 2016, 3:48 pm

User threatened me to remove/edit my review. Review stays up.

Regards.

**skidhackz** - August 23, 2016, 3:59 pm

Learn to read:I said review my product and justify it, I don't have any problem with negative reviews.You are going to get reported and not because I'm salty.I know this could seem to some like I am intolerable towards negative reviews but this isn't the case at all.I don't give a fuck if this hurts my sales.That kind of behaviour is not accepted.When you post a negative review you justify it, I explained every one of your "arguments" and you didn't care to take it back or explain.You basically reviewed a product of your imagination, not what I'm selling and claiming.

It's party night tonight and I'm late.Expect a report tomorrow.

**thecoon411** - August 23, 2016, 8:34 pm

So this is for what, pedophiles? Seriously disturbing.

I don't comment or interject my opinions much here but this is a SERIOUSLY messed up concept and the ONLY implication is that "girls" are defined by an age group by normal social conventions thus you intend to instruct people on how to infect, with a RAT, adolescent , pre-teens and teens.. If you read the responses in this thread you can clearly infer the meaning when a different poster suggested "2. You'd get more slaves going on a teen forum/teen chat/pregnancy forum and getting female slaves. This would literally get you 1-2 female slaves a day, which isn't worth anybody's time.".

I understand the vast majority of active users here are within a specific age group but this is just not appropriate. What you are supporting and endorsing is the exploitation of woman and teens/young woman. If you do not understand the implications of what you are doing, and I SERIOUSLY doubt that, then at the behest of every victim and advocate and survivor of this type of exploitation, stop. Close this and get therapy. I can only imagine the contents of your hard drive would become a 25 year to life sentence.

**skidhackz** - August 24, 2016, 5:25 am

You took this all wrong.I do not endorse anything.Of course it's not for pedophiles wtf are you talking about.I know what the other user said, I didn't like it either but I'm not responsible for other people's thoughts.

My hard drive is like a typical ratter's hard drive.You really think I would be so messed up and post here?You really think I would have a hard drive capable of sending me to jail for 25 years and post here?

You need to accept that everyone is responsible for his own actions and only.I personally said use this for social experiments.Are females a very popular target for ratters?Are hot females more so?Do you like me to show you 15 more threads like this?

I respect your opinion and ethical views, they are just different than mine :)

**Lord\_Jesus** - August 24, 2016, 10:26 am

I just received a vouch copy of this. I can say it is very detailed and tells you every single step. A

really good method overall! It can be real fun ;)!

**skidhackz** - August 24, 2016, 2:24 pm

I updated the eBook fixing some grammar mistakes. I wrote this in a hurry and never read it as a whole so it had some mistakes, mostly from edits. There is 1 vouch copy available.

**YayHar** - August 24, 2016, 2:46 pm

I was given a vouch copy and I will give my 100% honest review.

This ebook is not the greatest.

In some instances this would work, but let me point out some flaws without giving out too much information on the method.

- Most people use phones for social media, and not their computer
- Platforms such as Instagram and Snapchat won't allow DMs on PC
- You send the stub in a zip
- You're going off the assumption that the person will care about his/her image.
- You have to pose as a friend if I am correct?
- If that last one was wrong, you will have even more trouble.

So with all these flaws I found, I want to point a few things out that will drastically lower the rates:

- Your target has to be a girl
- Your target has to care what people think
- Your target has to be gullible
- You have to message them one at a time
- Your target has to access social media on the computer
- Your target CAN NOT be using instagram or snapchat on PC

With ALL those things in mind, you kind of get the feeling that this method is good on paper, but doesn't really work that efficiently once executed.

If you're looking to be a pervert and wank to some random girl through her webcam like a complete psychopath, then feel free to buy this ebook because guaranteed within 2 hours you'll get ONE install. Maybe.

I don't condone this method, especially the way it's advertised.

Good luck with sales.

**skidhackz** - August 24, 2016, 2:54 pm

Thank you for the honest review. Maybe I should change the way I present this, for ethical reasons. To the point:

- Girls always care about their image, that's the hypothesis of this technique. I think that's set in stone.
- You pose as a friend, that's why you need at least one facebook account, you are using a stolen account to infect their friends. You could target people outside the friends list but that would lower success by much.

-You could use the Yahoo technique with your Facebook account to get everyone's emails and start with email spreading.I describe a good technique on how to do an initial email spreading.I added the Yahoo part in the ebook, with details.

-Of course target should open this from their PC, not smartphone.I should update this with an idea to maximize that chance, eg sending it on Monday night.They should be home at that time and day, smartphones don't open exe so even if they try it with smartphone first, due to the method it's quite possible that they will open it from the PC after.That's my opinion.

**?Opulence** - August 24, 2016, 8:24 pm

OP sent me a vouch copy and asked if I would review it. I can say that if you are specifically targeting girls this method will work. It does require some patience and you may struggle at first, but the concept is spot on.

This is a pretty straight forward method and can help you get installs slowly, but I see the potential to scale this up after you get your first few down.

There are many grammar mistakes and a few spelling, but you will easily be able to understand the method. OP's grammar did not change the effectiveness of the method taught in the eBook.

If you are struggling to get female installs, or if you're targeting a specific group of girls, this method might be worth the \$5.

#### Disclaimer

I do not use RATs for malicious purposes, I have no use for the method described. This review was based on the hypothetical effectiveness of the method.

**skidhackz** - August 25, 2016, 9:51 am

Thank you for the review, quoted.Now I'm gonna take a very careful at the grammar, I admit I didn't pay too much attention there :)

Just to clarify, the method doesn't need you to be creative or improvise in any way.It's only one way, it requires no thinking and no decisions from you, except from picking your targets.It's pretty much copy/paste.I think it's the strongest SE you can use in females.

**skidhackz** - August 27, 2016, 10:53 am

Added another spreading method:Network/Wifi spreading (targeting of mass spreading).Lowered prices for everything.

**MRCASHMONEY101** - August 29, 2016, 3:05 am

(Aug 23, 2016 04:09 AM)skidhackz Wrote: [\[CITE\]](#) I'm selling 2 Targeted Spreading methods.The first works on girls specifically, it's targeted spreading through facebook.I see that girls are a popural target for rats so I decided to sell this.The other one is Spreading through Network/Wifi.

The hot girls method is a smart way with almost zero effort that takes advantage of women's psychology and guarantees results more than anything else I have tested.

This is a simple, yet high quality method.Once you read it and understand a little about women, you realize beforehand that it will work.It requires access to a facebook, yours or other's.One is enough because soon you will have access to most accounts of those who got infected.The spreading then is exponential.You won't need to be having a conversation in order to infect them.But you target them one by one, so it takes some time if you want to do it for many girls.This is mostly for targeting hot girls.You can aslo target girls you know but you have to reach them first (to be friends with them in an account you control)

You can use the method even without access to a Facebook account, but it needs some initial spreading. So I also give a second technique of spreading, through emails, again by exploiting women's psychology. You can use the email technique if you know their emails. You can also use your own Facebook, if you want, and get the emails of all your FB contacts by using the Yahoo trick (also described in the eBook).

So if you don't have access to a Facebook account yet, you can start with the email technique. FYI, both are using women based SE, but the first technique (FB to FB) is a lot more powerful.

Keep in mind that this method is not for mass spreading, it's targeted spreading. I'm offering a much much higher probability of infecting specific females you chose.

The second spreading method is targeting people on the same network/wifi. You can pick targets, judging by their device names, or you can do mass spreading to all devices on the network. This is not a worm, so the infection is not guaranteed. It depends on the target.

I suggest you also buy the SmartScreen package unless you have a good doc exploit. If you don't have either the infection rate will be lower, due to ZoneID.

This is for testing purposes only, like social experiments. I have no responsibility for your actions.

One spreading method | Price: 3.99\$ [Girls Spreading: <https://hexpay.org/p/ywme6>] | [Wifi/Network Spreading: <https://hexpay.org/p/eplh5>]

Both spreading methods | Price: 5.99\$ <https://hexpay.org/p/iwe72>

Sorry, I'm not accepting paypal due to chargebacks.

**HexCrypt** - September 9, 2016, 8:10 am

Seems interesting! I am currently developing a plugin for Orcus, NanoCore, and Imminent Monitor

that will allow you to digitally sign your executables with a valid certificate, which bypasses SmartScreen.

I have a proposition that could possible benefit us both. If you are interested, please send me a PM!  
Thank you.

**thumple** - September 10, 2016, 4:10 am

I can't believe I lived so long without knowing about this.

**skidhackz** - September 10, 2016, 7:59 am

The smartscreen bypass is now 9.99\$ with proportional price drops in combos, 12\$ for the combo with 1 spreading method, 14\$ for the combo with both spreading methods.

These prices are final

**\*DWM\*** - September 10, 2016, 8:14 am

I have Pmed you i whana buy it now pliz reply

**L33T Member** - September 10, 2016, 9:37 am

I'd rate 8/10 the "Girls Spreading" is worth \$4

You are able to 15 bots a day

Easy to read

Downsides

It isn't auto so you must work to get bots (Not to be a hard ass)

That's pretty much my review

**thumple** - September 10, 2016, 1:02 pm

How much would it cost to order a hit on someone in particular?

**nemosky** - September 10, 2016, 1:32 pm

Can it be used for mass spreading through email attachment?

**skidhackz** - September 10, 2016, 7:21 pm

(Sep 10, 2016 01:32 PM)nemosky Wrote: [\[CITE\]](#) Can it be used for mass spreading through email attachment?

No, at least not with gmail.I'm on smartphone right now, I can try sending it in a rar and tell you, it should work.

(Sep 10, 2016 01:02 PM)thumple Wrote: [\[CITE\]](#) How much would it cost to order a hit on someone in particular?

Sorry, I wont do it.The method is 4\$ and I wouldnt do anything different than that.

**#Skyline** - September 11, 2016, 6:01 pm

Interesting. I've never seen a spreading method that includes spreading via WiFi. Not sure to believe it or not, as I haven't seen it, or any research by security researchers regarding this.

Without asking about the method to much, does it use a wireless protocol to spread, or just basic networking protocol's via LAN ?

I'm interested.

(Sep 11, 2016 06:01 PM)#Skyline? Wrote: [\[CITE\]](#) Interesting. I've never seen a spreading method that includes spreading via WiFi. Not sure to believe it or not, as I haven't seen it, or any research by security researchers regarding this.

I'm interested.

It's a MITM/SE method via LAN

Does it work for mass spreading through email attachment when zipped

(Sep 11, 2016 09:32 PM)skidhackz Wrote: [\[CITE\]](#) It's a MITM/SE method via LAN

Ok, so basic networking attacks. Thanks for clarifying dude, was just wondering.

Best of luck with sales.

(Sep 11, 2016 09:33 PM)nemosky Wrote: [\[CITE\]](#) Does it work for mass spreading through email attachment when zipped

Only tested with gmail, it looks like it checks inside the zip/rar so no.if i figure a way to do it i will let you know

(Sep 12, 2016 04:26 AM)skidhackz Wrote: [\[CITE\]](#) Only tested with gmail, it looks like it checks inside the zip/rar so no.if i figure a way to do it i will let you know

Gmail doesn't allow rar or zip files..you shud try using yahoo or hotmail..one more question, can the file be renamed to. Scr?

Tried hotmail, it's sendable.

this looks very very interesting hmmmmmmmmmmmmmmmmmm

(Sep 11, 2016 09:32 PM)skidhackz Wrote: [\[CITE\]](#) It's a MITM/SE method via LAN

Taking advantage of ARP spoofing to then HTTP redirect to a very nice looking "missing plugin" site or something? If this involves social engineering, then it's very close to what I'm saying.

(Sep 14, 2016 09:31 AM)skidhackz Wrote: [\[CITE\]](#) Last day sticky.All combos with smartscreen have 20% off with the coupon code:skidhackz2016

This is valid until Friday.coupon not working...

(Sep 13, 2016 07:34 AM)QU?CKSILVER Wrote: [\[CITE\]](#) Taking advantage of ARP spoofing to then HTTP redirect to a very nice looking "missing plugin" site or something? If this involves social engineering, then it's very close to what I'm saying.

Missing plugin is very saturated and not creative at all. I have 2 SE templates for 2 specific scenarios that actually cover most wifi scenarios. But you are right about the general method.

**nemosky** - September 28, 2016, 11:59 am

This is my question..can this smartscreen and zone id bypass allow the stub to be zipped in winrar and spread through email attachment?

**skidhackz** - September 29, 2016, 8:32 am

(Sep 28, 2016 11:59 AM)nemosky Wrote: [\[CITE\]](#) This is my question..can this smartscreen and zone id bypass allow the stub to be zipped in winrar and spread through email attachment?

Yes it does, it doesn't change anything.

**skidhackz** - October 3, 2016, 12:13 pm

I decided to just sell the Smartscreen bypass and give for free the spreading methods to those who buy.

If you want to target university students through shared wifi or specific female targets through facebook then this is all you need.

**skidhackz** - October 17, 2016, 12:59 pm

Now the Smartscreen Bypass includes the free FUD method of [this](#) thread for free

**vonBrown** - October 25, 2016, 2:28 am

Is it EXE or VBS? Watching the scan result from 1st post and got a doubt

**skidhackz** - October 25, 2016, 7:37 am

(Oct 25, 2016 02:28 AM)ExeConverter Wrote: [\[CITE\]](#) Is it EXE or VBS? Watching the scan result from 1st post and got a doubt

No, nothing like that.It doesnt convert it, it's actually sophisticated hex editing.

**201** - November 9, 2016, 1:29 am

How many clients can i get per day using the hot girl method?

**skidhackz** - November 19, 2016, 4:19 am

I was away from home and couldnt log in here through 3g.Its not automated so it's up to you.Due to fb limitations on private message (especially if they are similar or same) I'd say about 10 every 15'

**skidhackz** - November 20, 2016, 1:46 am

(Nov 20, 2016 12:39 AM)BitbyBit Wrote: [\[CITE\]](#) If it works it works. But I'll never test because it adds a hell of a dependency requirement to whatever file you want to bypass the smart screen filter with.

I personally think you should mention that in the thread as some may not be happy about that once they find out. Either way you get what you pay for so I can't complain.

Hello, of course I do

Quote:The method has at least 70-75% success rate on every Windows version and on any type of users (eg. gamers, professionals, girls, kids etc).

You can do a random check on at least 10 machines and tell me if it's less than 70% vulnerable.I'm quite certain it's not.Thanks for buying, if you have any questions or want any spreading advice feel free to PM me.

**skidhackz** - November 21, 2016, 12:14 pm

(Nov 20, 2016 12:44 PM)BitbyBit Wrote: [\[CITE\]](#) I guess, but I wouldn't say the dependency has anything to do with Windows version. That line makes it seem like it's dependent on a security update or Windows DLL's when in reality it's a third party software dependency. True it's on a good deal of machines but I don't think it's something the average PC user installs, but I guess you do mention gamers/coders and such so eh I'll shut up.

Well you can do a check on more than 5 average users pc and post results.i did extensive testing before posting statistics.The description is precise

**roosterbabe36** - November 22, 2016, 3:37 pm

OP I am looking for to buy the Smartscreen bypass method from you. I am only concerned of that. Before I make a purchase, I would like to know an honest reply from you that, how much is the success rate in general. Like out of 10 windows8 build installed machines and also out of 10 windows10 installed machines, how much success ratio?

Also, regarding the free fud method, is it still fud? If i use a crypter then is there any complications? Which crypter is suggested, you can name a couple options to make sure you are'nt giving advertisements for any particular crypter. Looking forward for a reponse as soon upon your convenience. Thank you.

**skidhackz** - November 23, 2016, 5:27 am

send me your skype i will answer your questions in details

**roosterbabe36** - November 23, 2016, 7:15 am

Really appreciated for your prompt response OP. My skype is- tamashi.acc@gmail.com

**skidhackz** - November 23, 2016, 7:57 am

i added you on skype.im posting here for everyone to see.success rate is at least 7 out of 10 machines, regardless of windows version.it works on every windows version.

The free fud method works with any crypter but i suggest you do the procedure before crypting.

**roosterbabe36** - November 23, 2016, 8:08 am

Thanks OP. You are awesome. Love you.

Commenting for later, might come back.

**skidhackz** - February 17, 2017, 3:28 pm

Everything is working like day one. Spread easily with no limitations!

**? [\$(1000)\$] ?** - February 18, 2017, 9:39 am

The spreading rate with the smartscreen bypass is quite impressive.I've got way more slaves than usual.

The wifi spreading works really well.It should infect the majority of systems in the network.

I didn't test the girls spreading but it's a quite clever method.Most of the females will certainly fall for this.

The free fud takes some time, I tried it with a public free keylpgger and it got from 29/35 to 5/35.I didn't think it would remove so many detections.When I have time I will try again.

**BlackPanth3R** - February 18, 2017, 4:18 pm

Commenting for reference.

**skidhackz** - February 19, 2017, 11:50 am

**IT IS SHACO** - May 14, 2017, 4:02 am

BIG BIG BIG VOUCH for that product.. At first I thought it was fake and impossible to bypass smartscreen.

But that's really working ! I just spread like windows xp now for real!!!

Ty skidhackz for that ebook and your support really friendly and helpfull

**skidhackz** - August 15, 2017, 5:59 am

Back in business!! I was very busy with my offline life duties and now I'm back. I've restored all projects since hexpay closed, everything is up on Selly now. Projects fully supported for old and new customers.

I've added a new trick in the Wifi/LAN method. It's a method of cracking wpa/wpa2 encrypted networks. It's a simple yet smart idea, it's no guarantee but it will certainly work on a few networks. This is not a wps pin crack (which I suggest you try first) and of course it's not a brute force attack since that would take forever.

The goal is to be able to target specific people using the Wifi spreading method (your next door neighbor for example), by entering their network.

I only support Paypal for the whole package, you can PM me. Only trusted users and only friends and family paying option.

**James Blond** - August 20, 2017, 12:41 am

I think the Wifi Spreading Tutorial to buy. Your design is very nice bro.

**Minun** - August 20, 2017, 1:35 am

Does this method includes/requires winrar?

**skidhackz** - August 20, 2017, 9:05 am

Cheers

**Grynner** - July 30, 2018, 6:19 pm

Wow, This layout looks amazing, is it possible to combine multiple methods?

**Glock40** - July 30, 2018, 10:22 pm

Tbh im not some retarded feminist bu, like how much of a bitch do you got to be to market this as a way to get hot girl slaves. To many virgens on this site smh lol.

**skidhackz** - August 15, 2018, 3:33 am

(Jul 30, 2018 10:22 PM)FrozenSolidddd Wrote: [\[CITE\]](#) Tbh im not some retarded feminist bu, like how much of a bitch do you got to be to market this as a way to get hot girl slaves. To many virgens on this site smh lol.

Wherever there is demand there is supply.Do you not agree?Shouldn't I take advantage of this for my profit?It's called capitalism.You are following too many conservative news too quickly for you to absorb the info.You can have this fetish and not be a feminist, though I wouldn't say you wouldn't be a loser either.But hey, we are all losing at something.

BTW good for you to consider the high test alpha role to be the goal, even if you haven't managed to be one.

(Jul 30, 2018 06:19 PM)Grynner Wrote: [\[CITE\]](#) Wow, This layout looks amazing, is it possible to combine multiple methods?

Yes, all of them can be combined.

**r4nd0mdvr** - August 16, 2018, 6:31 pm

What's the chance that it'll currently bypass smartscreen?

**skidhackz** - August 18, 2018, 4:54 pm

(Aug 17, 2018 05:00 AM)SlowMehMo Wrote: [\[CITE\]](#) To be fair, hot girls run programs the same as everyone else... stupidly, also, hot girls and guys are already on the computer all you need is a search engine.

However, i will say if its anything like my method about using already running processes to inject a library then its pretty good and worth the money.

As long as it doesnt involve social engineering to get them to decrease there security.

Dude, you do not understand the fetish or you pretend you aren't.If all you need is a search engine there is no need for all of those methods you've read, yet there is.Also, no social engineering at all in smartscreen bypass.I doubt you can inject anything and that's because you can't execute it in the first place.

(Aug 16, 2018 06:31 PM)r4nd0mdvr Wrote: [\[CITE\]](#) What's the chance that it'll currently bypass smartscreen?

more than 70%.The longer the victim is using the computer the bigger the chance for it to work.if it is a newly formatted pc it has a better chance to land on that 25-30%.

**SlowMehMo** - August 19, 2018, 4:24 am

(Aug 18, 2018 04:54 PM)skidhackz Wrote: [\[CITE\]](#) -Snip-

Well first of all, my method has like 99% chance of bypassing smartscreen and im not even selling mine, so i dont know what your going on about, does your stuff work or not?

Because it seems like it only technically works if the other person has some VERY particular requirements, which means its basically useless.

And if you think women dont know how a computer works, then your badly mistaken as most of the system admins at eBay (Used to work there) are women and I needed there help all the time when i was there for several years.

"I doubt you can inject anything and that's because you can't execute it in the first place."

You clearly didnt read what i said, it uses already running processes to blindly inject dlls, the same concept was used when ppl where using discord to inject game cheats.

"If all you need is a search engine there is no need for all of those methods you've read"

Your saying there is no reason to infect someone other then watching girls... wow your a disgusting pervert and a complete moron.

The fact that you call it a fetish makes me puke a little, instead of looking up porn you insist on

infecting PCs to watch women? who could possibly be underage?

"more than 70%.The longer the victim is using the computer the bigger the chance for it to work.if it is a newly formatted pc it has a better chance to land on that 25-30%."

Ok, now i know its total crap, first of all the thread says -40% which doesnt even make sense, if a PC is newly formatted shouldnt really matter and i assume your making those stats up because otherwise you would have shown charts with execution rates in the op. Also, more than 70% + 30% is more then 100% so your saying it will have a 100% chance on machines that match your previously specified criteria...

Based on that logic i have a newly formatted laptop that i havent used in awhile, your telling me if i ran your file and gave you a full week then i would have a 100% chance of infection. Well ill make you a deal, you give me a file, i run it on my laptop, which has all my custom tools and security installed and running, if you can open a messagebox that says "skidhackz Owns This Box" ill give you \$15,000.

**skidhackz** - August 20, 2018, 2:30 pm

Same old story.Unhappy guy with the uber unique bypass method that he never sells because he hates money.LOL.

1.I barely have time to log in here a couple of times a week, not gonna address every question in the bible you wrote just because you have desire and time for it.My method works, that's not up for debate.70%+ success rate is not VERY particular requirements, it's extremely common ones that even a newly formatted pc may have.

2.I didn't say women don't know how a computer works.You are making things up.

3."You clearly didnt read what i said, it uses already running processes to blindly inject dlls, the same concept was used when ppl where using discord to inject game cheats."

You say IT uses already running processes.IT.So you already run a process.So unless you talk about an exploit of another process you can't run a process without Smartscreen coming up.

4.When did I say the only reason to infect machines is to infect girls?Again, making things up.Also, I never encouraged anyone to do it.

5.Voyeurism is a fetish, a common one and a very old one.Grow up, the world is filthy as it has always been.Never said it's good, never said it's legal.Also, I never encouraged anyone to do it.

And one last thing:Why do you have a Webcam spy implemented in your rat?Hahahahahah, this guy.

6.You are even trying to find percentages errors in my thread?LOL.What is your motivation for this?You are clearly miserable and have too much time to waste envying on my thread.I do not.Feel free to externalize your anhedonia on my thread, it changes nothing.And please, do you think I owe you proof of anything or my time?

Everyone who bought it is satisfied.

I remind you this is a sales thread.If my method is crap you can keep your money and look elsewhere.Me and the rest here are fools, clearly.

I personally use the bypass and it works so great that it actually soothes me to be able to infect

win8/10 with so much ease :)

SlowMehMo - August 22, 2018, 11:24 pm

(Aug 20, 2018 02:30 PM)skidhackz Wrote: [\[CITE\]](#) I remind you this is a sales thread.If my method is crap you can keep your money and look elsewhere..

I personally use the bypass and it works so great that it actually with so much ease :)

"Same old story.Unhappy guy with the uber unique bypass method that he never sells because he hates money.LOL."

I dont sell it because its too easy to use, its not worth selling when someone can do this themselves pretty easily. Its not that im unhappy, its that your a disgusting perv.

"I didn't say women don't know how a computer works.You are making things up."

Its in the title, your targeting women specifically, stop implying things and then trying to defend yourself against them. This is HF not 4chins kiddo.

"So unless you talk about an exploit of another process"

Thats exactly what i said, wow your dumb as shit, its not even complicated to understand. You clearly dont know jack shit.

"When did I say the only reason to infect machines is to infect girls?"

See

"If all you need is a search engine there is no need for all of those methods you've read"

"Voyeurism is a fetish" "Grow up"

Your a 12 year old that needs to watch girls because you cant get any in real life, And you DO Encourage it, its in the title, your using it as a selling point, thats pretty encouraging.

"making things up"

You do realize we can see your previous posts right?

"soothes me to be able to infect win8/10"

"Infect" illegal activity confirmed, also, you know what else works? doing nothing is just as effective as your method because most of the time they just run it anyway, you do realize there are rats sold on this very forum that bypass smartscreen right when there ran right? And I dont mean injecting a library, i mean a exe that when executed does not trip smartscreen, that is plenty of proof that you dont know jack shit about anything.

"Why do you have a Webcam spy implemented in your rat?Hahahahahah, this guy."

Your disgusting, it has an assload of uses, its a all purpose camera, it can be used to watch your PC while your away, can be used on raspberry pis to create your own cameras or drones, pretty much anything that you would use a normal camera for, and breaking news, not all cameras are used for pervs, ESPECIALLY ONES THAT HAS A MESSAGE POP UP, WARNING THE USER ABOUT THE CAPABILITIES AND HOW TO REPORT ABUSE AND WHERE TO REPORT IT.  
Roflmao

And thats about it, imma add you to the ignore list because your a disgusting human being and with your attitude you'll probably be banned soon anyway.

So, GLWS and good luck in prison you disgusting trashy person that cant get real women and dont have the slightest clue about how a computer works and persistently argues with coders while you yourself havent coded a damn thing.

**skidhackz** - August 23, 2018, 3:47 am

Sure dude.Im much older, my current girlfriend is hotter than the hottest you'll ever fuck, that's a pretty safe bet.You dont believe me?Check my older posts on my profile.Others have said the same and one day I was in the mood to post proof of how I look (hint:ripped) and how does my gf.Unidentifiable pictures of course.

As for the rest, meh, no reason to respond.Stay in your misery.

Im in for the money, if I was a perv I would keep this to myself.Also the most common theme for spreading and targeting is girls in this forum.Countless guides.

Method works and people are very satisfied as you can see.That's why Im responding to you, if I was scared about my sales I would avoid any drama in my thread.Bye.

**skidhackz** - August 27, 2018, 12:00 pm

Please no mass spreading with the Smartscreen bypass.If you intent to use it that way DO NOT buy.It's fairly easy to stay FUD but I had to reFUD it twice since I started selling it.Respect it and don't ruin it for everyone.

Peace

**Mans Hot For Life** - September 22, 2018, 2:50 am

Nice where to purchase mans hot 4 woman

I can no longer edit the original post.Added LTC as a payment option in Selly.gg in order to pay with minimal fees.

Cheers
