Thread: [SmartScreen Bypass](#)

skidhackz - August 23, 2016, 4:12 am

Previous thread is here:<https://hackforums.net/showthread.php?tid=5380661>

This is a legit bypass of SmartScreen/ZoneID tagging of downloaded files, working on every version of Windows. And it is for sale.

You buy rat, crypter you have everything set, but your execution rates are too low, especially on windows 8 and 10 with that ominous SmartScreen warning. Ratting is nowhere where it used to be.

Now you can spread normally again. It allows you to execute your rat/keylogger/downloader without any prompts. This is not a ZoneID delete method, it's working right from the first execution.

You will never see this window:

[img]<http://winaero.com/blog/wp-content/uploads/2015/10/Windows-10-SmartScreen-Warning.png>[/img]

Or this window:

[img]<http://woshub.com/wp-content/uploads/2015/06/do-you-want-to-run-this-file.jpg>[/img]

The method has at least 70-75% success rate on every Windows version and on any type of users (eg. gamers, professionals, girls, kids etc).

1. My instructions are detailed, everyone can do this, although I will provide support to those who need it.
2. I wouldn't call this an exploit but it certainly exploits Microsoft's carelessness.
3. It doesn't require any social engineering, the victim simply executes by double click. If he does, he is infected.
4. I don't provide support on this thread. You can PM me with your situation and I would help with more details if needed.
5. You are not allowed to leak the method, or give any hint about it whatsoever once you buy.

(Aug 22, 2016 08:38 AM)Katarina Du Couteau Wrote: [\[CITE\]](#) Vouch for this eBook.
Normally eBooks are shit, but this one works :)

It's a genius method that will actually work.
Have fun!

(Aug 20, 2016 09:42 AM)L????? Wrote: [\[CITE\]](#) Before I start this I would like to thank skidhackz for giving me a vouch copy of this ebook.

Quality 10/10

The layout of this ebook is very simple and organized.

Ease-Of-Use 10/10

The author gives many detailed pictures that help the reader understand the method fully. It's very simple and easy to follow.

Originality 10/10

You will find this method nowhere else on hack-forums

Final Thoughts

This method on bypassing smartscreen is very smart and simple. I don't believe it will ever be patched by Microsoft. I guarantee that this method will work on your targeted audience. EX: Gamers

For only 15 dollars this method is very worth it as I believe it could sell for a massive amount of money.

GoodLuck with Sales SkidHackz

(Aug 24, 2016 06:30 AM)Codefuser Wrote: [\[CITE\]](#) I can vouch for this, I have known this method before but then he revealed it to me and I know it works. It is easy to use and it does not involve certs.

(Aug 20, 2016 11:10 PM)PaaShA Wrote: [\[CITE\]](#) I just got my copy , It works fine . Its not really a method it's an idea came from a smart brain which does work!

Each and everything is stated in ebook , How to do and what to do, Noob Friendly. However this will not work for

25%-30% of systems. But Yes You can make this work for all the system if you got a brain !

Good method, well explained, with pictures and stuff... Thank you skidhackz...

Sleek. - August 24, 2016, 5:00 am

So zoneid never prompts?

Does it involve certificates?

I can vouch for this, I have known this method before but then he revealed it to me and I know it works. It is easy to use and it does not involve certs.

skidhackz - August 27, 2016, 1:15 pm

I'm closing this thread and joining it with the spreading methods thread.

nemosky - August 28, 2016, 4:17 am

Will be nice to have the zone id and smart screen issue removed
.nice one op..posting to get back here
