Description:

Viotto Keylogger is a software created to satisfy most of your computer surveillance needs, thanks to the many high-customizable functions and options that it offers.

This software is not just a simple keylogger, since it doesn't log only keystrokes, but also: Active windows (and websites title)

Clipboard Screen

Launch and termination time (useful to see when system has been started or shutted down)

Despite its extensive assortment of feature, VKL is very light on size and system resources. This is the size of:

Public version: 36 KB

Private version: 72 KB (compression function disabled)

Private version: 26 KB (compression function enabled)

The Keylogger is programmed to use a minimum amount of CPU, to keep it light and stealth. This is achieved also thanks to the keyboard hooking technique used in VKL.

Let's show few examples of Viotto Keylogger use: Monitor your personal computer (or computers) use: just launch the keylogger once and forget it when you don't need it, it will do all the work for itself, included automatic installation (if you want) so you will not have to re-execute it after restarting your computer. Thanks to the user idle-time logging function, it is easy to see exactly when your personal computer was accessed, and what has been done.

Monitor your systems remotely: All the logs and screenshots can be delivered to your own e-mail and / or FTP address and you will be able to access them whenever you want, with no need to browse directly your computers. Thanks to the keylogger hidden installation and logs file encryption, it will be very difficult for users to notice that their computer is under surveillance.

Retrieve login details or passwords: using the selective keylog function, keylogging will be filtered and will be recorded only actions in the windows/webpages that you specify. This option, beyond helping you monitor only what you need and not everything, is a great function to get passwords or login details (Skype, websites, etc.). When passwords are not saved or login page is protected, "password stealers" programs fail, but keylogger always gets them. Timer Trigger or Clock Trigger functions match perfectly selective keylog feature, since it is not expected much keylog data (when rather Size Trigger function usually offers a better choice).

This software has been successfully tested and resulted compatible under WinXP, WinVista, Win7 and Win8.

Free public version:

Logs keystrokes using keyboard hook technique (never misses a keypress, low impact on system resources). Save logs locally, or send them to e-mail and / or FTP.

Hidden installation: VKL is able to automatically install itself and run on each reboot with no user interaction needed. It is also able to hide its own installation files. No EOF settings, VKL is easily compatible with crypters or other similar support tools.

Logs launch time and termination time (for example when computer is started or shut down). Keylogger can operate in hidden mode or visible mode.

Download Public Version:

Zip Pass:VKL

Private version:

All the features available in public version, plus:

Force relogin: even if login data were stored, it will need to be retyped (and logged) Clipboard logging: VKL gets copied / pasted text.

Screen capture: VKL takes screenshots of the monitor when you specify and sends them to your e-mail and / or FTP or saves them locally. Logs encryption: data in logs file can be encrypted with your chosen key. Logs stored in the hard disk will be always encrypted, and when sending them to e-mail or FTP they will be decrypted on the fly. Inbuilt in the client there is a logs decrypter to easily decrypt logs if saved locally.

Logging filter: activate the keylogger only if user is writing in a window which title contains one or more specified words (for example "facebook;hotmail;msn"). Useful also to get login data / passwords. Time triggers: in addition to the Size Trigger also available in public version, you can use the Timer Trigger or the Clock Trigger. The first send logs each x hours, the second after a specified day time.

Automatic updater: when launched, the builder automatically checks if program updates are available. If so, a prompt will appear asking if you want to download new version.

You will receive your order within one day (usually less).

You must have accepted the [Terms of Use](#) before using this software.

More HQ stuff from OP. Keep it up bro.

ParadiseDealz - August 23, 2016, 11:30 am

HQ Product by Op this logger is working in great condition no issues at all after trying it out ! vouch for Viotto keylogger

Mcbride - August 23, 2016, 11:41 am

i can safely vouch for eminem, good luck with sales brother

Viotto01 - August 23, 2016, 12:14 pm

Thank you Eminem for your nice thread. :)

I am the coder of Viotto Keylogger.
And Eminem is my only authorized reseller here at HackForums.

Best regards,

Viotto

Removed the Auto-Buy feature.
[PM](#) for Questions/Payments!

m4dh4ck3r - August 29, 2016, 1:14 am
Been looking for a keylogger for no dependency.
Posting here so I can buy later.
His crypter works perfectly.
Pretty sure I can count on him for this too :).

Yes I've received the Payment, Program will be sent @ the Email u provided asap.

MRCASHMONEY101 - August 30, 2016, 10:38 am

bought this and i like the nice feature this clear cookies feature is the best Thanks so much
AND also the Copy/Paste feature this is really great so i can see what was the Copy/Pasted info

E M I N e M - August 31, 2016, 7:18 am

Only a few people values the smart functions like the ones u mentioned!!
Clearing cookies is better than passy grabbers on the view of an expert.?

Thanks for the feedback bro and Enjoy ur KL <3

Regards,

nathanjamesleo - July 2, 2018, 5:51 pm

does it need dependency to run on a PC?

bobsakino - July 2, 2018, 10:18 pm

Thank you for free stuff. I would like to donate!

E M I N e M - July 10, 2018, 6:27 am

(Jul 2, 2018 05:51 PM)nathanjamesleo Wrote: [\[CITE\]](#) does it need dependency to run on a PC?
The program it self is VB6, and it's dependency is a default file until windows 10.
The agent file is native as well.

xMikee02 - July 10, 2018, 10:44 am

I'm really sorry that I don't understand this stuff that well but I have Windows 10, and I wanted to try out the free version.

I extract the zip file, but when I try to run the application I get this message "Component 'CODEJO~3.OCX' or one of its dependencies not correctly registered: a file is missing or invalid"

I have both files in the same folder, what am I doing wrong? Thanks for this really good looking

piece of coding btw

E M I N e M - July 10, 2018, 10:53 am

Solution:

Spoiler ([Click to View](#))

OCX Problem/Register/Fix steps:

1) Place the [ocx](#) file in folder (copy/paste it):

32 bit OS -> C:\Windows\system32\

64 bit OS -> C:\Windows\syswow64\

2) Open cmd as ADMIN and run command:

64bit - regsvr32 "C:\Windows\syswow64\Codejock.Controls.v13.2.1.ocx"

32bit - regsvr32 "C:\Windows\system32\Codejock.Controls.v13.2.1.ocx"

Or try without the " "

3) Now you should be able to open VKL with no problem and if still also Run VKL as ADMIN.

Yup this seems to fix the problem.

Thank you so much <3

riddickval - December 5, 2018, 5:38 am

i would love to buy..

although no one is talkin about recovery function

please specify whhich clients it recovers password from

outlook

thunderbird

foxmail
eudora
etc
