TBH bought this ebook thinking it would stand out and be different from the rest. Honestly, the methods in this ebook are very well known, and have very little success rates due to the fact everyone knows them.

That is not true, if you follow the method exactly, you WILL make money, I only used it for about a week and a bit and you can see my proof of earnings on the first page of this thread. If you are

having trouble with the method or there is something you don't understand, just PM me for help, even though you bought the basic package which does not include support ?

I mean, im thinking of buying this as the proof you showed seemed realistic. Rather than this \$300 a day stuff.

Yes you can make money with this, and to be honest it isn't really that expensive. I will tell you though that you WILL need to put in some time for this, because you will never find a legitimate method that will make you alot of money without some sort of investment or effort, but if you put in the time and work you will very easily make money

Not trying to be a dick but your title is a little misleading. Anyone making 300/m can NOT be their own boss, let alone pay their bills.

Edited thanks ? I just added the 300\$/month because this is real. Unlike other ebooks that claim to make 10000 a week...

You need to upgrade to give rep. Check <https://hackforums.net/upgrade.php> and We recommend you take the time to read the [HF Help Documents](#) section. The answer to your questions should be contained in there.
