Well, why would you sell a cracker, advertise 30+ modules and not list all your modules in the first place?

Review:

A bit buggy I would go to logs then try and switch to results and it crashed. Some of the modules he said were there weren't. Other than that it's a good cracker really fast.

Mind pming me the modules? Probably something I can easily fix in the code. I will look into the bug and try to find out why it's crashing. Thanks for the honest feedback
